AACPS SUMMER 2022

AACPS planned a wide range of summer programs for elementary, middle, and high school students. Overall AACPS had **89** unique summer programs and/or camps with **10,853** students in attendance.

Programs were focused on helping students engage in unfinished learning following this unprecedented school year, with a focus on mathematics, literacy, and preparing for the next grade level. All programs supported students to have fun while building healthy relationships with peers, practicing skills, and learning new concepts.

Elementary and middle school programs offered mathematics, literacy, cultural arts, movement, mindfulness, and co-curricular experiences. At the high school level, there was a wide range of opportunities to earn high school credits in all subject areas required for graduation – credit recovery and original credit opportunities. Traditional summer offerings, including Extended School Year (ESY), Summer Engage Academy, SOAR, Soaring to Success, Summer Bridges, Arlington Echo experiences, and other academic and co-curricular enrichment opportunities and camps were offered. Importantly, our community-based partners joined us to design and offer this robust summer suite of programs for our students across the county.

Budget

Category	Program	Object Group	ARP/ESSER/Summer Budget	Summer '22 Expenditures	Balance	% Spent

Student Identification Process

Participation was open to any interested student for this summer camp; however, when selecting students to attend, students who were economically disadvantaged were provided 50% of the available slots.

Format

In person (all participants and instructors in person in same physical space).

Provisions

Transportation was provided for in person participants.

Food was provided for in person participants.

Results

Students have grown and learned more about the Chesapeake Bay and the many amazing animals that inhabit such an important body of water. Campers learned to try new things overcoming fears and engaging with their natural surroundings. Campers made new friends, explored new places, and were able to remove themselves from electronics and enjoy some of the greatest places Annapolis has to offer.

Description: This camp allows children to experience quintessential "Bay" activities such as fishing, crabbing, kayaking, and more traditional camp activities such as nature walks, team-building games, arts and crafts, science experiments, and a wide variety of other recreational and educational activities and field trips. The program runs at the Seafarers building on 301 Chester Avenue, Annapolis, MD 21403 and provides two meals each day (breakfast and lunch).

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a students' grade-level or elective.

Description: This is a 4 day experience-based camp. Using the transdisciplinary practice of inquiry and argumentation, students will select a lens from which to examine each experience. Choice of lens will be guided by the AP courses they are enrolled in for 2022-2023 school year. Students will spend 4 days exploring Annapolis and Baltimore. *Students must be enrolled in an AP Course for the 2022-2023 to participate in this program.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

Description: A free outdoor environmental day camp for AACPS students who have an interest in the environment, making new friends, adventure, and personal growth! Campers will experience 4 fun filled days at AACPS's Arlington Echo Outdoor Education Center in Millersville, Maryland immersed in the natural wonders of Chesapeake Bay ecosystems! Traditional camp activities provide opportunities to explore, investigate, and experience a variety of nature-based activities including ecology, hiking, canoeing, swimming, archery, arts and crafts, songs, games, and fun!

Goals: (1) Remediation or reteaching of missed or missing grade-level content, for students who are identified as behind on grade-level content. (2) Support for student mental health and well-being.

Description: A Counselor in Training will assist the camp directors and counselors in providing our campers a fun and safe week of camp. This is an opportunity for young adults to learn management and leadership skills in a fun camp setting. Tasks may include set up and break down of activities, assisting with supervision of campers, and ensuring camper safety. CITs are essential, and help to keep camp functioning smoothly! Breakfast, lunch, and a snack will be provided. Bus transportation will be provided.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

Description: A free 7 day, 6 night backpacking experience for adventurous campers seeking to explore the natural world in the wilderness setting of Shenandoah National Park. Campers will spend the first day and night at AACPS's Arlington Echo Outdoor Education Center in Millersville, MD, learning all skills necessary for backcountry camping. Then we'll board a bus and head to the trailhead where our real adventure begins! We'll climb mountains, explore valleys, sleep under the stars, and splash through streams while making friendships and memories to last a lifetime. Interested students will need to submit a video or essay, explaining why they wish to attend this camp as part of their application. Space is very limited due to the nature of the program. Parents will need to provide their own transportation to/from Arlington Echo.

Goals: (1)Remediation or reteaching of missed or missing grade-level content, for students who are identified as behind on grade-level content. (2)Support for student mental health and well-being.

Before and After Care Camp

Content Area(s)

- ARTS
- SOCIAL
- OUTDOORS

Student Identification Process

Participation was open to any interested student for this summer camp; however, when selecting students who were economically disadvantaged were provided 50% of the available slots.

Format

In person (all participants and instructors in person in same physical space.)

Provisions

Transportation was not provided.

Food was provided for in person participants.

Results

The students were provided an exit survey at the end of the camp. They were asked five questions about what they learned from the dinosaur theme, Medieval Children's games and the Pyramids or Mayans. Based on the exit survey:

- 78% of the students were able to identify a new fact they learned about dinosaurs and were able to write a written response.
- 65% of the student were able to write a fact that was learned about the pyramids or Mayan's.
- 73% of the students were able to identify a game that was played by children during the Medieval Times.

Description: AA County Recs and Parks is excited to offer a before and after care experience for children in elementary school. During before and after care, children will engage in a variety of activities such as: arts & crafts, STEM & Literacy enrichments, organized games, activity stations, and outdoor play. Care will be provided AA County Recs and Parks is excited to offer a before and after care experience for children in elementary school.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

Bilingual Book Club Literacy Camp

Content Area(s)

- ACADEMICS
- ARTS
- CULTURE

Student Identification Process

Participation was open to any interested student for this summer camp; however, when selecting students who were economically disadvantaged were provided 50% of the available slots.

Format

Hybrid (some participants in person with instructor, some times participants were virtual).

Provisions

Transportation was not provided.

Food was not provided.

Results

Pre and post assessments elicited student responses about their confidence levels when participating in the target language across four language domains. Student responses reflected an increase in confidence levels as follows: Speaking 26%, listening 26.8%, reading 2.4%, writing 16%. At the final session students were asked to reflect on their multilingual/multicultural identity by affirming the following statement with a likert scale: I am proud that I can speak two or more languages. Students responded "somewhat true" or "very true" at the rate of 88.2%.

Description: These book clubs are designed for bilingual elementary students to build community and promote bilingualism and biliteracy. Bilingual teachers will facilitate the book clubs, encouraging students to read along and discuss a new book at each session in their home language. Additionally, students will participate in engaging activities and crafts aligned with the featured book. Students should be native or advanced speakers of the book club's targeted language. Literacy in the target language is not required for participation. Students who participate will receive a copy of each book, as well as other materials and supplies, free of charge.

Goals: Enrichment or teaching of skills, or content that are not part of the required content, that is advanced beyond a student's grade-level or elective.

Provisions

Transportation was provided for in person participants.

Food was provided for in person participants.

Results

- Pre-test: 43%
- Post-test: 50%
- Increase: 7%

Description: The Camp SOAR summer program is offered to support identified students currently in grades K-5 at schools that receive Title I funding. The program provides an opportunity for students to continue to grow their foundational skills, comprehension, and number sense through a 4-week program in a relaxed, upbeat setting. If your child is enrolled in 2nd grade for the Camp SOAR summer program, they may be chosen to participate in a modified summer instructional program for targeted students leaving 2nd grade. Students in this class will engage in targeted literacy instruction to help prepare for the transition from learning to read to reading to learn. Students will also participate in targeted math instruction in number and operations and algebraic thinking to prepare for the increasing math content's rigor in the 3rd grade. The school's Title I team will reach out to students' families meeting the required criteria with an invitation to register for the program.

Goals: (1) Remediation or reteaching of missed or missing grade-level content, for students who are identified as behind on grade-level content. (2) Support for student's mental health and well-being.

- SOCIAL
- OUTDOORS

Student Identification Process

Participation was open to identified homeless students.

Format

In person (all participants and instructors in person in same physical space).

Provisions

Transportation was provided for in person participants.

Food was provided for in person participants.

Results

- Pre-test: 76.09%
- Post-test: 77.17%
- Increase: 1.08%

Description: The focus of the grant project is a partnership and cross-system collaboration to provide identified students with an enrichment opportunity that supports their academic competence, social-emotional well-being and physical health. During the summer months, the stressors of homelessness can become more compounded as youth are left with little to do during the day and limited space to safely engage in outdoor play. Parents and caregivers experiencing homelessness are also more likely to work low-wage jobs that cannot be done remotely and that offers little schedule flexibility and the need for daycare. Through a partnership with Anne Arundel County Parks and Recreation identified student's experiencing homelessness will have the opportunity to participate in Camp Success, a summer camp program that includes recreation, academic support, and daycare for families.

Goals: (1)Remediation or reteaching of missed or missing grade-level content, for students who are identified as behind on grade-level content.
(2)Support for students mental health and well-being.

- Post-test: 80%
- Increase: 10%

Description: This camp is for students who are interested in learning industry, career, and technological skills. What better place to spend part of the summer than a career camp that can help a young person find a new and exciting career path? Imagine a day camp at the Center of Applied Technology North where you can learn Adobe Photoshop; construct a toolbox; patient care skills; manage computer hardware; design & produce culinary items, establish farm-to-table techniques; architect technical documentation &/or create baked goods. Our camp is a great way for students to explore their future career interests! Students will need to bring their own lunch.

Goals: Opportunities for career and technical education students such as work-based learning experiences, preparation for credentialing exams, earning required hours for industry credentials, technical skills development, and/or career exploration.

Food was provided for in person participants.

Results

The CAC offered many learning opportunities for our students. They engaged in performing visual and performing arts activities where students learned their lines, songs and choreography and dance routines to perform in front of their families. As well as painting a canvas based on a character they developed while reading stories. In other camps that had a focus on STEM activities, students were able to construct sound machines and catapults.

Description: CAC has partnered with AACPS to offer a variety of in person Art Camps for our students this summer. These camps are offered at no cost to all currently enrolled AACPS students.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

Deliciously Nutritious Summer Camp A

Content Area(s)

- CULTURE
- COOKING

Student Identification Process

Participation was open to any interested student for this summer camp; however, when selecting students who were economically disadvantaged were provided 50% of the available slots.

Format

In person (all participants and instructors in person in same physical space).

Provisions

Transportation was provided for in person participants.

Food was provided for in person participants.

Results

The students in this camp were provided the opportunity to learn about baking deserts and other baked good items. They baked breads, rock candy, cupcakes, fudge, cakes, and homemade pasta. Students were taught about food safety and standard kitchen protocols to keep the food and bakers safe. Students worked in teams to accomplish different baking tasks. Students and families responded positively to the camp in their exit interviews and communications with the camp counselor. They also showed their success with picture evidence.

Description: At Deliciously Nutritious food is at the center of every thing we do. With over 20 years of experience as a Chef & Culinary Instructor, Chef Melissa Sherwood blends her love of food, passion for wellness and culinary skills to provide lessons that students will carry with them throughout their lifetime. We strive to teach students the importance of healthy eating, proper nutrition, and overall wellness. It is our goal, that through our camps, students will develop a lifelong love of working in the kitchen, cooking, preparing meals and trying new foods.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

FILMSTERS Academy

Content Area(s)

- ARTS

Student Identification Process

Participation was open to any interested student for this summer camp; however, when selecting students who were economically disadvantaged were provided 50% of the available slots.

Format

In person (all participants and instructors in person in same physical space).

Provisions

Transportation was provided for in person participants.

Food was provided for in person participants.

Results

During this camp experience, students learned the process for what it takes to develop a short film. They were involved in the writing and planning a script. They were exposed to camera operations, lighting, costumes, and the editing process. More advanced groups looked at higher end resolution cameras (4k) and the editing process. They created 3 short films during these camps that were presented and a film festival with about 500 people in attendance. They were given credit for their work in the program to show they were closely involved in the entire process of film making.

Filmsters Academy 1 Week

Description: Film Camp includes learning the creative process with a "hands-on" approach to filmmaking. We offer three levels of Instruction: Beginners, Intermediates and Advanced. This experimental mentoring, led by our young instructors who are in film schools or in the industry, makes for an especially memorable time. Special industry guest instructors provide a bit of movie magic for our young filmmakers.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

FILMSTERS *Academy*

Content Area(s)

- ARTS

Student Identification Process

Participation was open to any interested student for this summer camp; however, when selecting students who were economically disadvantaged were provided 50% of the available slots.

Format

In person (all participants and instructors in person for in same physical space).

Provisions

Transportation was provided for in person participants.

Food was provided for in person participants.

Results

During this camp experience, students learned the process for what it takes to develop and short film. They were involved in the writing and planning a script. They were exposed to camera operations, lighting, costumes, and the editing process. More advanced groups looked at higher end resolution cameras (4k) and the editing process. They created 3 short films during these camps that were presented and a film festival with about 500 people in attendance. They were given credit for their work in the program to show they were closely involved in the entire process of film making.

Filmsters Academy 2 Week

Description: Film Camp includes learning the creative process with a "hands-on" approach to filmmaking. We offer three levels of instruction: Beginners, Intermediates and Advanced. This experimental mentoring, led by our young instructors who are in film schools or in the industry, makes for an especially memorable time. Special industry guest instructors provide a bit of movie magic for our young filmmakers.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

Leaders in STEM Camp

Content Area(s)

- LEADERSHIP
- SERVICE
- SOCIAL

Student Identification Process

Participation was open to any interested student enrolled in a STEM program.

Format

In person (all participants and instructors in person in same physical space).

Provisions

Transportation was not provided.

Food was provided for in person participants.

Results

The students in this camp were given a pre/post assessment. Questions 1, 2 and 3 had correct and incorrect solutions. The students improved on these questions by a 50% increase. Student could identify 2 negative effects of litter, name 3 self-awareness skills, and calculate the cost of certain items for an even. Questions 3, 5, and 6 asked the students interpersonal skills about leadership, confidence and skills for the future in stem careers. Overall, students showed more interest and confidence in their ability to lead others. These results were based on a Likert scale of 1-5.

Description: The Youth Empowerment Summer Camp is a two-week camp that takes students on a self-growth leadership journey to develop their social, emotional, cognitive, and 21st century skills. While on this journey, students explore what it means to be a leader and exemplify such leadership, and explore and participate in STEM-related activities. Students will also explore the workforce by participating in STEM-related field trips to local businesses and to nonprofits where they will gain hands-on experiences learning about jobs, the skills needed to be an exceptional employee, and how organizations work together to serve the needs of the community.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

Description: STEM Magnet Program students are required to complete a summer experience each summer grounded in one or more of our STEM Values: Empathy & Mindfulness, Making & Changemaking, Design & Systems Thinking, Radical Curiosity & Revolutionary Imagination, Passionate about Play, and Ethics & Integrity. These programs provide STEM students an opportunity to refine such 21st century skills as critical thinking, communication, creativity, problem-solving, perseverance, collaboration, and information & technological literacy. Students are also afforded the opportunity to build meaningful relationships with their STEM teachers and fellow STEM students.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

Description: Plant-based foods and restaurants are booming in America. Ever wanted to learn new and creative ways of creating your favorite foods but with a healthy twist? Look no further. This offering will give you the basics you need to build a healthy, delicious repertoire of plant-based meals and desserts that will wow any omnivores and herbivores alike. High schoolers with some knowledge/experience in the kitchen would probably fare best in this course. Students will learn the basics of plant-based eating and cooking and be able to transform standard recipes into plant-based versions.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.

Second Space Visual Arts Camp

Content Area(s)

- ACADEMICS
- ARTS
- CULTURE

Student Identification Process

Participation was open to students who were identified as Gifted and Talented in Visual Arts.

Format

In person (all participants and instructors in person in same physical space).

Provisions

Transportation was not provided.

Food was not provided.

Results

- Pre-test: 62%
- Post-test: 85%
- Increase: 23%

Description: This is your chance to push yourself further as a visual artist. You will engage in daily art prompts that allow you to explore the visual arts with like-minded students and instructors. The summer sessions are focused on drawing on location with an eye on nature, architecture, and the figure. Journaling will also be emphasized daily as we develop and experiment with a wide array of skills and techniques. Students who are interested in participating in this camp will need to arrange their own transportation. Additionally, students will need to pack a lunch and water each day as the camp will be outdoors and bring a pencil and sketchbook.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level, or elective.

Secondary Summer School

Content Area(S)

- English Language Arts
- Mathematics
- Social Emotional Learning

Student Identification Process

- Participation was open to any student who failed a course.

Format

- Virtual (no participants in person). Synchronous (all participants were online at the same time, and at the same time as the instructor).

Provisions

- Transportation was not provided.
- Food was not provided.

Grades "Results"

A	933
B	916
C	728
D	367
E	186
TOTAL	3130

Description: The secondary summer school offers students a limited number of secondary courses and provides students the opportunity to make up work in which they were unsuccessful, improve grade averages in sequential subjects, and earn credits to meet high school graduation requirements. Each course is highly concentrated and reviews the course content to meet AACPS course standards.

Assignment to Secondary Summer School will be determined by the student's home school.

Goals

(1) Remediation or reteaching of missed or missing grade-level content, for students who are identified as behind on grade-level content.

Description: The day camp will support students through the college application process. They will learn that the entire application tells "their story." of passions and values that they hold dear so that college admissions will see who they are and what they will bring to their college. College reps will share information about what they "look for" in the application, essay, and supplements. Students will get help brainstorming and starting their personal essays. They will get information on the supplement questions and essays. A Financial Aid expert will talk to students during camp and their parents that evening about the financial aid process. At the end of the week students should have a good start on Telling Their Story. More information will be forthcoming stay tuned. There will be two camps offered this summer: Annapolis High School July 11-14 or Old Mill High Schools August 1-4th. Invitation only.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level, or elective.

Youth Classes by Anne Arundel Community College

Content Area(s)

- ACADEMICS
- ARTS
- MATH

Student Identification Process

Participation was open to any interested student for this summer camp; however, when selecting students who were economically disadvantaged were provided 50% of the available slots.

Format

In person (all participants and instructors in person in same physical space).

Provisions

Transportation was provided for in person participants.

Food was provided for in person participants.

Results

Students participated in a variety of course that each had different outcome. They had hands on learning experiences that focused on improving reading and writing daily and extending their math skills. They used the scientific method to plan design and build a city while engaging in different roles for city development. They also learned about the Chesapeake Bay and the different types of ecosystems around our area. Students were able to complete projects, games, and activities around these themes to enhance math and reading skills.

Description: AACPS is partnering with Anne Arundel Community College to provide a plethora of summer camp options. These are full camps that range in courses for Math, Science, Art, Photography, and Performing.

Goals: Enrichment or teaching of skills or content that are not part of the required content, advanced beyond a student's grade-level or elective.
