Wildlands Graphic.....	22

Overview of the Departments Public Lands System

Maryland is recognized throughout the Nation for its innovative land acquisition and protection programs, including Program Open Space, the GreenPrint Program and the Rural Legacy Program. The Department of Natural Resources (DNR) manages over 446,000 acres of public lands and protected open space in the State. From Swallow Falls State Park in the Alleghenies to the Pocomoke River State Forest on the Eastern Shore, the Department's public lands represent some of the most significant ecological and cultural landscapes found in Maryland. Each year, thousands of visitors also enjoy DNR's public lands for a variety of outdoor recreational opportunities, including wildlife observation, boating, fishing, hiking, hunting, mountain biking, and camping.

The purpose of this document is to provide the latest acreage report on the different types of land units that are managed by the Department. Resource Planning serves as the statewide planning and property control and management program for the Land and Water Conservation Division within DNR. Program functions include the development of strategic natural resource, land conservation and protection, and recreation plans for DNR's public lands; plans for individual state parks, forests, and other designated public land units; and upon request, natural resource and recreation related plans and studies for local jurisdictions. Related to this report, Property Control's cadastral and survey staff are responsible for maintaining the deeds, records, and acreage figures for all of the Department's public lands. This staff also provides support in the boundary maintenance efforts of the land management agencies.

For administrative purposes, DNR has divided the State into four regions that are identifiable by their physiographic and historical characteristics:

The acreage totals within each region are summarized below:

WESTERN	181,273
SOUTHERN	37,915
EASTERN	161,329
CENTRAL	65,594
	<hr/>
	446,111

Land Unit Designations

The Department's Land Units are designated according to their significance, resource management practices, and recreational focus, or by a special act enacted by the Maryland General Assembly. For reference in this document, the different land unit designations or types are briefly discussed below:

A **State Park** (SP) is operated primarily for outdoor recreation purposes and open space conservation. The State Forest and Park Service (SF&PS) is the managing entity for designated parks. Rail trails (RT) are separated for this report but remain the jurisdiction of the SF&PS

There are several types of parks administered by the State Forest and Parks Service:

-Multiple-Use Parks are suitable for intensive recreational development and use, and development may include roads, parking, picnic areas, camping areas, and boat launching facilities. Examples of Multiple Use Parks include: Greenbrier State Park, Gunpowder Falls State Park, and Rocky Gap State Park.

-General Recreation Parks accommodate light to medium recreational development and use on a smaller scale than Multiple Use Parks. Big Run, Calvert Cliffs, and Herrington Manor are classified as General Recreation Parks.

-Waterfront Parks have a waterfront on the ocean, bay, or a lake as its principal attraction. Development often is as intensive as Multi-Use Parks. Assateague, Deep Creek Lake, and Jane's Island are Waterfront Parks.

-A Historic or Scenic Park is recognized for its historic significance or scenic interest. Several Historic or Scenic Parks include the Casselman Bridge, Fort Frederick, and Gathland.

A **State Forest** (SF) is managed for multiple purposes, including water quality protection, wildlife enhancement, timber, scenic or natural beauty and low-intensity recreation. The State Forest and Park Service manages most of the state's designated forests, including Savage River State Forest, Pocomoke River State Forest, and Green Ridge State Forest.

A **Natural Resource Management Area** (NRMA) is managed by the SF&PS for the optimal use of the resources on the site, including wildlife management and agriculture. NRMAs do not accommodate intensive recreational uses, and they are typically used for hunting, fishing, wildlife observation and water access. The Monocacy in Frederick County and Wye Island in Queen Anne's County are examples of NRMAs.

A **Natural Environment Area** (NEA), also managed by the State Forest and Park Service, is generally 1,000 acres or more, and is an area that has significant or unique geological or ecological resources & development is generally confined to trails, interpretive facilities and limited support facilities. The Severn Run NEA and Mattawoman NEA, both located in DNR's southern region, are some of the larger NEAs found in the State.

A **Wildlife Management Area** (WMA), administered by the Wildlife and Heritage Service, focuses on wildlife management activities and low intensity wildlife-related recreation, including hunting and wildlife observation. Many WMAs were purchased with federal funds that restrict intensive development, and prohibit or limit certain types of outdoor recreational activities and uses. Over 40 WMAs are located throughout the State, from the 15 acre Cheltenham to Fishing Bay, which is over 28,500 acres.

A **Fish Management Area** (FMA), under the jurisdiction of the Fisheries Service, varies from a highly specialized fish propagation facility to a public fishing pond.

Other Classifications used in this document:

A **State Wildland** is a special designation established by legislation that "overlays" all or part of a state park, forest, wildlife management area or other DNR land unit. There are over 43,773 acres of Wildlands in the State that are recognized by the Maryland General Assembly as containing wilderness characteristics and otherwise outstanding and unique natural features worthy of preservation in a natural state. Maryland's Wildlands are equivalent to the National Wilderness Preservation System.

A **Heritage Conservation Fund Site** is not an official land unit designation, but includes properties that have been acquired specifically for the protection of identified endangered plant or animal species and significant habitats.

An **Unclassified** Land Unit is a property that often is under a special management or partnership arrangement with another government or nonprofit entity.

An **Undesignated** Land Unit usually includes newly acquired properties that are undergoing or have yet to undergo a public involvement and planning process - the recommendations in a completed Land Unit Plan determine the designation(s) of a land unit. Chesapeake Forest (58,257 acres) is presently Undesignated.

County Abbreviations used throughout this report are listed below:

<u>Abbreviation</u>	<u>County</u>	<u>Abbreviation</u>	<u>County</u>
ALLE	<i>Allegany</i>	HARF	<i>Harford</i>
