

Maryland Strategic Energy Investment Fund

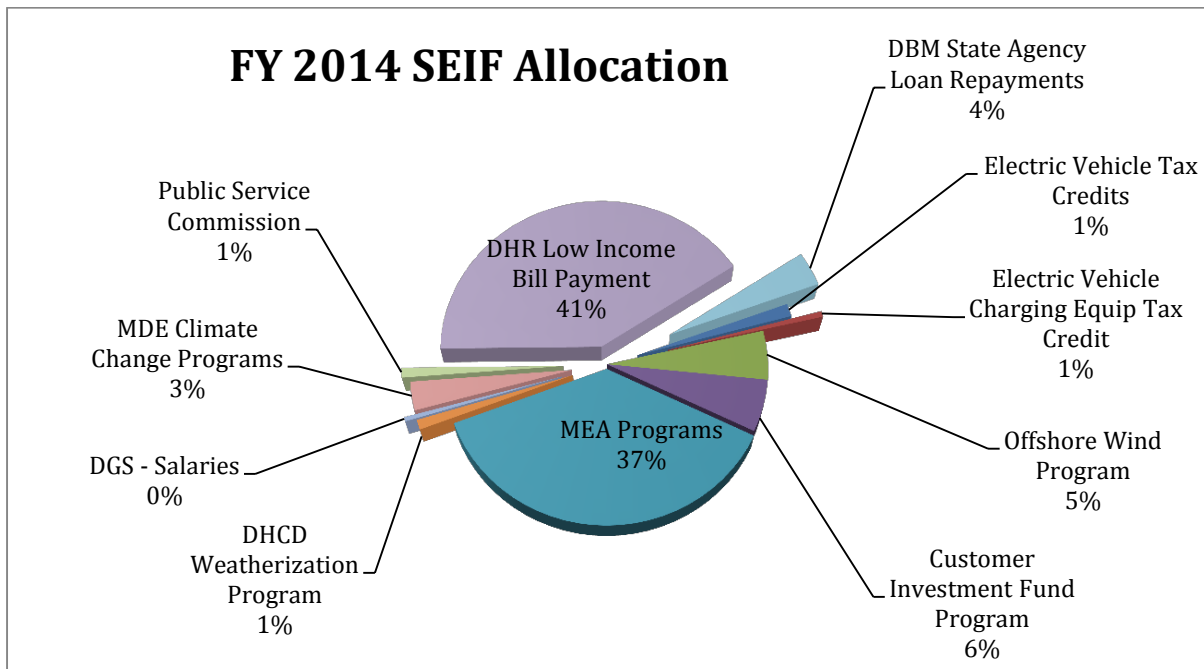

Report on Fund Activities FY 2014

prepared by the
Maryland Energy
Administration

INTRODUCTION

The Maryland Energy Administration (MEA) has been following its mission to promote affordable, reliable and clean energy using monies from the state Strategic Energy Investment Fund (SEIF). MEA's programs help reduce household bills, create new jobs in the energy sector, address global climate change, and promote energy independence. In addition to MEA, funds from the SEIF are allocated to a variety of other entities in the State to perform important energy- and climate-related work. A breakdown of the FY14 SEIF allocation is provided in the pie chart below.

The SEIF is comprised of a variety of funding sources. The main source is proceeds from Regional Greenhouse Gas Initiative (RGGI) auctions. The fund also includes income from the Exelon-Constellation merger settlement (the Offshore Wind Development Account and the Customer Investment Fund, or CIF), Alternative Compliance Payments from entities that are required to comply with the State's Renewable Portfolio Standard, and a few other minor sources of funding. Appendix A to this document details all sources for amounts received by the fund, along with a detailed accounting of disbursements from the fund. This attachment also includes details on RGGI auctions, including the number of allowances sold, allowance prices, and estimated future revenues.

A detailed description of the activities funded through the SEIF is provided on the following pages. Additional detail on the programs and projects listed below can be found on MEA's website, through the Strategic Energy Investment Map located at www.energy.maryland.gov/map. Using the map, interested parties can view individual projects that MEA has helped to fund in their neighborhood. The map also shows investments by zip code, county, and legislative district and by technology or sector served.

The map supplements other transparency efforts that MEA makes. Annually, MEA provides a report on all disbursements over \$25,000 to the Department of Budget and Management (DBM), which publishes the data on its Funding Accountability website. MEA also publishes a list of open and historic residential and commercial Clean Energy Grant Program awards (its largest program, by number of grants), and issues press releases when awards are made for many of its competitive programs. Appendix B to this document details FY14 grantees with their respective award amount.

MEA PROGRAMS

A. EmPOWER Clean Energy Communities Low-to-Moderate Income Grant Program

SEIF Budget: \$9.6 million

Beneficiaries

Non-profits and local governments receive funding from this program to implement energy efficiency measures that benefit low-to-moderate income Marylanders. Examples of past awardees include non-profits (e.g., Habitat for Humanity affiliates), Community Action Councils, Housing Authorities, and county and local governments.

Description

The EmPOWER Clean Energy Communities grants are competitively awarded to energy efficiency projects that generate significant energy savings, with the benefits of the energy savings being passed on to Maryland's low-to-moderate income residents. Priority is given to projects that maximize energy savings and the number of low-to-moderate income residents that benefit from the measures. Through FY13, MEA allocated grant funds to each county formulaically based on county income levels and then evaluated applications competitively on a county-by-county basis, ensuring a fair distribution of funds across the State. In FY14, the same county-by-county approach was used for a portion of the funds, but with remaining funds the program was expanded to also include a statewide competition for larger projects that would help communities, neighborhoods, or entire buildings take advantage of economies of scale. So far, over 2,200 houses, apartments, and buildings have received energy efficiency upgrades through this program. Past projects include residential whole building upgrades where an audit identifies and recommends cost effective energy measures while detecting and ameliorating health and safety concerns, energy efficiency improvements to homeless shelters, and HVAC upgrades.

Projects funded by FY14 grants are still being installed by grantees. While the annual savings estimates shown below only reflect energy measures installed to date, final FY14 energy savings are expected to be higher once all projects are complete. The summary report below shows total project savings, including energy savings from some energy measures that may be benefitting from other funding sources such as utility incentives.

Program Accomplishments

Fiscal Year	FY14
# of grants	60
Annual savings (kWh)	1,984,768
Annual savings (MMBTU)*	13,597

*Includes: Natural Gas, Propane, #2 Fuel Oil

B. Clean Energy Grant Program

SEIF Budget: \$8.3 million

Beneficiaries

Beneficiaries include homeowners, businesses, nonprofits, and State and local government entities that install renewable energy systems.

Description

MEA's Clean Energy Grant Program (CEGP) is designed to support renewable energy installations across the State of Maryland. The Clean Energy Grant Program provides incentives for solar photovoltaic, solar water heating, geothermal heating and cooling, and wind energy systems. Beginning in FY14, the program also included incentives for commercial-scale solar photovoltaic canopy systems that include charging for electric vehicles and community wind projects. Incentive levels are established based on the size and type of the renewable energy system. The number of grants processed as part of the CEGP program highlights the success of the program. It should be noted that some of the larger commercial scale projects funded in FY14 are still being installed. Savings and capacity estimates for these projects are included in program details below, but are subject to change.

Program Accomplishments

Fiscal Year	FY14
# of grants	2,444
Annual savings (kWh)	31,730,312
Solar PV Capacity (kW)	15,490
Solar Thermal Capacity (SF)	17,365
Geothermal Capacity (Ton)	2,319
Wood Stove Capacity (btu/hr)	28,511,776
Solar PV Canopy Capacity (kW)	5674
Wind Capacity (kW)	752

C. Maryland Smart Energy Communities

SEIF Budget: \$4.5 million

Beneficiaries:

Local incorporated governments (towns, cities and counties) benefit from this program. Examples of Maryland Smart Energy Communities participants include cities such as Bowie, Salisbury, Frostburg, and Bladensburg, and counties including Harford, Talbot, and Anne Arundel.

Description:

The goal of the Maryland Smart Energy Communities (MSEC) program, which was first offered in FY13, is to have local governments adopt energy policies and commit to them for the long term, leading to sustained energy savings and additional opportunities for renewable energy development. Once adopted into the program, MEA provides a limited amount of grant funding to help a local government pass energy goals and develop an energy baseline. Once the local government has successfully adopted two out of three policies (in energy efficiency, renewable energy, and/or transportation), it can leverage additional grant funding to assist with an energy project that helps achieve its MSEC goal. Maryland Smart Energy Communities reduce energy costs, improve environmental performance, and stimulate energy awareness among their residents and local businesses.

A full list of the MSEC communities that have adopted and committed to energy policies is below.

Aberdeen	Forest Heights	North Beach
Anne Arundel County	Frederick	Prince George's County
Baltimore City	Frederick County	Princess Anne
Bladensburg	Frostburg	Ridgely
Boonsboro	Garrett County	Rock Hall
Bowie	Glenarden	Rockville
Cambridge	Greenbelt	Salisbury
Capitol Heights	Greensboro	Seat Pleasant
Cecilton	Harford County	Somerset
College Park	Highland Beach	Takoma Park
Cottage City	Hyattsville	Talbot County
Denton	Landover Hills	Taneytown
District Heights	Manchester	Thurmont
Easton	Millington	University Park
Edmonston	Montgomery County	Westernport
Emmitsburg	Mount Rainier	Westminster
Federsburg		

Program Accomplishments

MSEC now has a total of 49 communities participating in the program, 40 of which received grants in FY14. Twenty-one grantees returned from the previous year.

Fiscal Year	FY14
# of grants	40
# of grants to municipal governments	32
# of grants to county governments	8
# of energy efficiency policies adopted to date	47
# of renewable energy policies adopted to date	39
# of transportation policies adopted to date	19

D. EmPOWER Maryland Challenge: Commercial and Industrial Grant Program

SEIF Budget: \$4.6 million

Beneficiaries

The Commercial and Industrial (C&I) Grant Program offers financial incentives to the commercial and industrial building sector. Program participants include warehouses, manufacturers, hospitals, and religious facilities.

Description

Maryland's commercial and industrial electricity consumption represent approximately 60 percent of the overall retail electricity sales in the State, but just about 30 percent of the energy efficiency savings realized through the EmPOWER Maryland program to date. A new program in FY14, the C&I Grant Program resulted from the recognition that the commercial and industrial sectors still had significant opportunities to save energy. The C&I Grant Program provides competitive grants to commercial and industrial applicants to install energy efficiency measures that achieve deep reductions in total building or space electricity usage. Grants cover a portion of the total project cost after utility incentives and other leveraged funds are applied.

Program Accomplishments

This program requires applicants to leverage EmPOWER Maryland incentives wherever possible. Some projects funded through this program have long lead times and many are therefore still being installed. FY14 annual savings estimates below reflect the projections of the electricity reductions that are anticipated to accrue from program-funded projects, but are subject to change. The summary report below shows anticipated total project savings, including energy savings from any energy measures that may be benefitting from other funding sources, including utility incentives.

Fiscal Year	FY14
# of grants awarded	24
Annual savings (kWh)	21,700,455 kWh

E. Kathleen A. P. Mathias Agricultural Energy Efficiency Program

SEIF Budget: \$1.0 million

Beneficiaries

The program benefits farms and businesses in the agriculture sector.

Description

The Kathleen A. P. Mathias Program offered its second round in FY14, having been piloted using federal Recovery Act funds in FY13. The program is designed to highlight cost-effective energy improvements in the agriculture sector. The program focused on energy efficiency upgrades that could save 20 percent or more of a building's energy needs. Examples of funded projects include upgrades to grain dryers, poultry houses, lighting, and motors.

Program Accomplishments

This program has demonstrated that cost effective deep retrofits are entirely possible in Maryland's agriculture sector. Through the program, MEA creates case studies and shares information on the projects, giving farms and businesses in the agriculture sector a local example and helping them to make informed decisions about pursuing similar upgrades on their own. MEA shares the case studies and project examples on the program website and through other venues, including the Public Service Commission, Horse Stewardship Council, the University of Maryland's Department of Agriculture and Resources Economics' Annual Agricultural Outlook and Policy Conference, and other agriculture industry stakeholders. The overall goal of the program is to highlight best practices and cost-effective retrofit opportunities.

Some projects funded by FY14 grants are still being installed by grantees. The annual savings estimates shown below are based on initial audit estimates. FY14 energy savings will be finalized as part of the project close-out process once all measures are installed.

Fiscal Year	FY14
# of grants	13
Annual savings (kWh)	728,278
Annual savings (MMBTU)*	9,204

* Includes: Propane, Natural Gas, and Diesel

F. Net Zero Schools

SEIF Budget: \$2.0 million

Beneficiaries

The program benefits new public schools being constructed in the Baltimore Gas and Electric service territory. In the first year of the program, two local education agencies signed on to participate in this program. Howard County’s new Wilde Lake Middle School and Baltimore City’s new Graceland Park/O’Donnell Heights Elementary and Middle School are both being designed and will ultimately be constructed to achieve net zero energy status.

Description

Through this Customer Investment Fund (CIF) program, three new public schools located within the BGE service territory will be designed and constructed with the goal of achieving net zero energy usage. This program will help fund the incremental cost of design and construction for the participating schools. FY14 is the first year of the program.

Program Accomplishments

Since new school design and construction is a multiyear process, no energy savings or generation benefits will actually accrue until the new schools are constructed and occupied. However, there are estimates of program impact that are available now. While design is still being finalized, one of the new schools being funded is estimated to have an energy usage intensity (energy usage per square foot) of 62 percent less than the existing school it is replacing.

Fiscal Year	FY14
# of grants	2

G. Next Generation Energy Efficiency for the Industrial Sector

SEIF Budget: \$880,000

Beneficiaries

Maryland manufacturers located within the Baltimore Gas and Electric Service territory benefit from this program.

Description

Through this Customer Investment Fund (CIF) program, Next Generation Energy Efficiency Gains for the Industrial Sector (NGEEG), the Regional Manufacturing Institute (RMI) funds training and consulting efforts that help Maryland manufacturers in the BGE service territory implement energy efficiency upgrades. This is accomplished by creating “Self Directed Green Teams” (SDGT) and by connecting participating manufacturers with financial resources available in the State to implement energy efficiency measures. As the developer of the NGEEG Program, RMI is MEA’s subgrantee and the program administrator. The program began in FY14.

Program Accomplishments

Thirteen manufacturers have participated in this program so far. It should be noted that the annual energy savings estimates are only provided for energy measures that were completed in FY14. Some participants from FY14 are expected to implement energy measures in FY15. These measures will accrue additional energy savings not included in the chart below.

Fiscal Year	FY14
# of manufacturers participating in program	13
Annual savings estimate (kWh)	608,195
Annual savings estimate (MMBTU)	1507

H. Small Business Energy Advance

SEIF Budget: \$2.4 million

Beneficiaries

Beneficiaries include small commercial and non-profit electricity customers within the Baltimore Gas and Electric (BGE) service territory.

Description

Through the Customer Investment Fund (CIF) Small Business Energy Advance (SBEA) program, BGE offers small commercial electricity customers an option to receive an “energy advance” for the costs (after all rebates are taken) of energy conservation measures implemented as part of BGE’s Small Business Energy Solutions (SBES) program. MEA makes a grant to BGE to administer the program. The program started in FY14.

Program Accomplishments

In FY14, MEA transferred \$2,387,500 to BGE to fund Small Business Energy Advances. While no Small Business Energy Advances were made during FY14, by December 2014, 145 Small Business Energy Advances totaling \$357,135 had been made, equating to 4,236,900 kWh saved annually. BGE continues to make Small Business Energy Advances from the funds transferred by MEA.

Fiscal Year	FY14
# of grants	1 (to BGE)
# of Small Business Energy Advances issued by BGE	145
\$ amount of Small Business Energy Advances issued	\$357,135
Annual savings (kWh)	4,236,900

I. Game Changer Competitive Grant Program

SEIF Budget: \$352,000

Beneficiaries

Clean energy businesses and non-profits in Maryland benefit from this program.

Description

The Game Changer Competitive Grant Program was offered for the second time in FY14. Through the program, MEA supports the deployment of innovative clean energy projects in the State of Maryland. Generally, Game Changer projects must display the potential to significantly advance the State's clean energy market, using commercially available technologies in projects that are physically located in Maryland. As the electric industry evolves more rapidly than ever before, the program has helped Maryland businesses to remain at the forefront in terms of clean energy deployment. For example, MEA funds helped to install the first commercial solar microgrid in Maryland, which demonstrates advanced battery storage systems that can be used during times of grid outages. This one example has informed several other initiatives related to resiliency and backup power, including the Resiliency through Microgrids Task Force and smaller projects combining renewables with battery backup power throughout the State.

Program Accomplishments

Fiscal Year	FY14
# of grants/loans	2
Annual savings (kWh)	1,577,410
Renewable Capacity (kW)	200
Geothermal Capacity (Tons)	-

J. Offshore Wind Development Program

SEIF Budget: \$5.2 million

Beneficiaries

This program, funded entirely by commitments made during the merger of Exelon and Constellation Energy, invests in research, surveys, and economic development initiatives to support Maryland's participation in the offshore wind energy supply chain and advance a major offshore wind project off of Maryland's Atlantic coast. Immediate beneficiaries include the businesses and institutions funded to support these efforts. Long-term beneficiaries are the ratepayers of Maryland who will benefit from a lower cost of deployment of an offshore wind energy project.

Description

MEA established the Offshore Wind Development Program to allocate resources contributed as a result of the merger of Exelon and Constellation energy in support of advancing offshore wind energy off Maryland's Atlantic coast. Most activities under this program are in concert with other Maryland agencies and institutions, including the Maryland Department of Natural Resources, the Maryland Ports Administration, and the University of Maryland system. FY14 was the second year of the program.

Program Accomplishments

Major initiatives funded by this program include:

- A high Resolution Geophysical Survey of the federally-designated Maryland Wind Energy Area (WEA);
- A cost-share partnership with the U.S. Dept. of Interior to conduct a Passive Acoustic Monitoring program for marine mammals in the WEA; and,
- A major analysis of Maryland port sufficiency to accommodate offshore wind energy deployment activities.

K. Maryland Energy Resiliency Grant Program

SEIF Budget: \$508,000

Beneficiaries

Owners or operators of service stations meeting certain fuel storage and sales requirements and located in Maryland were eligible for this program.

Description

The Energy Resiliency Grant Program was developed in FY13 and first implemented in FY14, after Hurricane Sandy left motorists stranded throughout the East Coast. Fueling stations lost power and could not provide fuel to vehicles being used to evacuate. This program reduces the financial burden on Maryland service stations to become more energy resilient so that Maryland citizens will have access to fuel, including gasoline and diesel, during power outages. The Program offered grants to offset the cost of planning, design, wiring and installing back-up power generators and/or pre-wiring at qualified Maryland service stations.

Program Accomplishments

Of the 32 service stations that initially signed grant agreements with MEA, a total of 25 service stations ultimately moved forward with a back-up generation project.

Fiscal Year	FY14
# of grants	32
# of systems with back-up generators installed	18
# of stations pre-wired for back-up generators	7

L. Electric Vehicle Charging at MARC and Metrorail

SEIF Budget: \$1.0 million

Beneficiaries

The general public that parks at rail stations in Maryland will be able to charge their electric vehicles.

Description

Started in FY14, the goal of electric vehicle charging at MARC and Metrorail is to dramatically expand the capacity for charging of Plug-In Electric Vehicles at rail transit stations throughout the state of Maryland. The Maryland Transit Administration (MTA) will use funds to add Electric Vehicle Supply Equipment (EVSE) to at least seven and up to twenty different locations throughout the MTA network. In addition MTA will use funds to install infrastructure to facilitate future installation of EVSEs at seven or more locations.

Program Accomplishments

MEA has issued a grant to the MTA to install equipment at between seven and 20 locations throughout the State.

M. Energy Technical Support

SEIF Budget: \$1.4 million

Beneficiaries

Beneficiaries include all Marylanders.

Description

MEA funds technical support for initiatives that support the State's energy efficiency, renewable energy, and transportation initiatives, improve energy reliability and resiliency, and reduce energy bills. Technical assistance funding may be used to develop new energy programs, conduct feasibility studies, and train and communicate information on important energy topics to targeted audiences. Some uses of technical assistance include the following:

- Website and technical support for the Home Performance with ENERGY STAR (HPwES) program in Maryland, particularly in the parts of the State that do not have access to HPwES through their local electric utility's EmPOWER programs;
- A study looking into the possibility of installing solar thermal technologies on Department of Public Safety and Correctional Services (DPSCS) and the Department of Juvenile Services (DJS) facilities in order to lower those facilities' energy bills;
- A feasibility study investigating the use of contract liens as security for qualifying energy efficiency and renewable energy projects, in order to potentially develop a new energy project financing option;
- The development of the combined heat and power program;
- Evaluation, measurement, and verification analyses of MEA energy programs; and,
- Training for building contractors and code officials on key elements of the energy code, based on the idea that a properly constructed building will result in lower energy usage and energy bills over the building's life.

N. Communication

SEIF Budget: \$104,000

Beneficiaries

Maryland residents, state and local government and nonprofit partners, and businesses were the direct and indirect recipients of all funds expended. Through sponsorships, marketing and outreach campaigns in FY14, approximately 500,000 Marylanders have been made aware of State initiatives, grants, incentives and opportunities for technical assistance that are available annually.

Description

Outreach programming is directly related to the Communications Department mission to effectively present the agency's programs that promote affordable, reliable, and clean energy to stakeholders, community partners, government agencies and the general public.

Program Accomplishments

In 2014, Maryland residents and businesses were reached through sponsorship of Artscape, "America's Largest Free Art Festival." MEA hosted five information booths/activation stations highlighting available clean energy programs, including transportation, solar energy, wind, and weatherization with access to local providers funded by MEA grants. MEA also reached out to local governments at the Maryland Municipal League and Maryland Association of Counties conferences, and attended many local communities' expos and conferences.

O. Administration

SEIF Budget: \$4.1 million

Beneficiaries

All Marylanders benefit from the policy and administrative efforts that occur under the SEIF.

Description

As a leading State in clean energy, Maryland has enacted some of most ambitious statewide energy legislation in the nation. In addition to joining the Regional Greenhouse Gas Initiative, Maryland has enacted:

- The EmPOWER Maryland Act that seeks a 15 percent reduction of both per capita peak demand and overall electricity consumption by 2015;
- 20 percent renewable portfolio standard by 2022; and
- 25 percent reduction in greenhouse gas emissions by 2020.

In order to meet these goals, MEA manages numerous programs and initiatives that increase the use of clean energy, renewable energy, and energy efficiency technologies among every sector in the State. Funding used for administration has allowed MEA to administer all the programs described throughout this report. MEA continues to design and launch new programs ensuring its place as a national leader in energy.

Program Accomplishments

While MEA's SEIF accomplishments have been well chronicled in the programs described in the previous sections, there have been many other areas of MEA focus that receive administrative funds in the form of staff time. These efforts help shape the policies that define Maryland's energy landscape. During FY14, MEA staff engaged on topics as diverse as improving reliability and resiliency in the wake of the Derecho, representing the State in utility merger proceedings, coordinating a group of experts to discuss microgrids, and developing a paper outlining recommendations on the legal, regulatory, and technical framework for microgrid deployment. New topics arise each year, and MEA staff will continue to engage in them and work to advance the Governor's energy policy goals.

NON-MEA PROGRAMS

A. Department of Human Resources Low Income Bill Payment

SEIF Budget: \$39.0 million

Beneficiaries

Low-income Maryland families that need assistance paying their energy bills benefit from this program.

Description

The Office of Home Energy Programs (OHEP) within the Maryland Department of Human Resources uses SEIF funds to provide electric assistance benefits to eligible low-income households. The SEIF funds are used for Electric Universal Service Program (EUSP) Bill Payment Assistance and Arrearage Retirement Assistance benefits. EUSP Bill Payment Assistance benefits are used to help make ongoing electric bills more affordable. Benefit amounts are based on electric usage and household income with a portion of electric bills being paid by the benefit. EUSP Arrearage Retirement Assistance is used to retire past due bills up to a maximum amount of \$2,000. A benefit is available once every seven years per applicant. All benefits were paid directly to electric utilities on behalf of the program applicant. None of the SEIF funds were used for OHEP administrative functions. No energy savings accrue as a result of this program.

Program Accomplishments

EUSP Program (FY14)	Amount	Households Served	Average Benefit
Bill Assistance	\$ 19,200,788	99,197	\$194
Arrearage Retirement	\$20,778,400	22,384	\$928

B. Department of Housing and Community Development

SEIF Budget: \$1 million

Beneficiaries

Low-income Marylanders benefit from energy bill savings.

Description

Each year, MEA provides funding to the Department of Housing and Community Development to supplement its Weatherization Assistance Program (WAP) funding. The Weatherization Assistance Program provides funding for energy efficiency improvements to low-income households. SEIF funds are used to perform health and safety retrofits, such as mold remediation or roofing repairs, to enable energy efficiency upgrades on homes that wouldn't otherwise qualify for the federal WAP program.

C. Maryland Department of the Environment

SEIF Budget: \$2.5 million

Beneficiaries

All Marylanders benefit from the efforts undertaken by the Maryland Department of Environment.

Description

Under the SEIF, the Maryland Department of Environment receives funding to pay State membership dues to the Regional Greenhouse Gas Initiative and run its climate program. The Greenhouse Gas Reduction Act of 2009 (“GGRA”) requires the State to reduce greenhouse gas (GHG) emissions 25 percent by 2020 and develop a draft and final State climate plan for submission to the Governor and Maryland Legislature in December 2011 and 2012, respectively. The plan must protect existing jobs, create new green jobs, have a net positive impact on Maryland’s economy, not adversely impact the reliability and affordability of electricity service in the State, and not disproportionately affect low-income or any other class of ratepayers.

Program Accomplishments

MDE’s accomplishments through its SEIF-funded climate programs include:

- Completion of MDE Regulation Changes: MDE completed all of the regulatory changes and related technical and economic support documents necessary to adjust the RGGI regulations based on the latest cap revisions.
- Updated Microeconomic Analysis of Climate Programs on Maryland’s Economy: MDE continued its contract with RESI to update the economic impact of the GGRA on Maryland’s economy using either better programmatic cost data or program refinements/ enhancements. This latest work will be part of the 2015 GGRA report due in the Fall of 2015.
- GGRA Manufacturing Study: MDE contracted with RESI to produce a study on the effects of GGRA programs on Maryland’s manufacturing base. The study is required as part of GGRA legislation and due to Governor/Legislature in the Fall of 2015. RESI is including specific Maryland case studies as part of the work to examine in detail the impacts of the GGRA.
- EPA 111d Analysis: MDE has been working through various groups (RGGI, Georgetown Climate Center) on evaluation of EPA draft rule on existing power plants and examining potential compliance mechanisms.
- Multi-Pollutant Analysis: The MDE continues to contract with NESCAUM to develop a multi-pollutant approach for pollution controls to be included in the final version of the 2015 GGRA Report. Through this multi-pollutant planning process, the MDE hopes to better integrate across environmental problems and design common sense, integrated, cost-effective solutions.

D. Electric Vehicle Excise Tax Credit

SEIF Budget: \$1.3 million

Beneficiaries

Anyone who registers a new electric vehicle (EV) in the State of Maryland is eligible for the tax credit.

Description

In 2010 the legislature passed a credit against the motor vehicle excise tax for certain qualified plug-in electric drive vehicles. This was a three year program and each vehicle was eligible for up to \$2,000. In 2013 the legislature extended the statute by one year and changed the incentives to be tiered based on vehicle kWh battery capacity. In 2014 the legislature extended the statute by 3 years and changed the tiered system to a flat \$125/kWh of battery capacity.

Program Accomplishments

Fiscal Year	FY14
# of grants	729
Annual savings (GGE)*	2,013,196

*Gasoline gallon equivalents

E. Department of General Services

SEIF Budget: \$427,000

Beneficiaries

State agencies and Maryland taxpayers benefit from this program.

Description

To help Maryland State government lead by example in clean energy, MEA and the Maryland Department of General Services (DGS) Energy Office manage several programs to reduce energy consumption in State buildings by assisting State Agencies in the development and implementation of green strategies.

Program Accomplishments

Through this program, DGS has accomplished the following:

- DGS manages a statewide energy database, capturing state agencies' nearly 5,000 utility accounts and approximately \$220 million worth of utility budgets, and created a baseline of energy usage for those accounts against which energy savings can be measured.
- Purchased electricity in de-regulated power markets on behalf of all Executive Agencies. Through an innovative electricity purchasing strategy for the larger accounts, DGS hedges for a portion of the future power requirements for State sites. By locking in rates for a portion of future power needs and purchasing the balance at real time rates, favorable trends in power prices are exploited to the State's benefit. DGS works with the University System of Maryland to achieve savings compared to comparable fixed price contracts.
- The State has installed solar photovoltaic electricity at four DGS buildings under power purchase agreements.
- The Department manages 21 energy performance contracts that will save approximately \$310 million throughout the life of the contracts, \$21.3 million annually, and greenhouse gas reductions of 130,000 of carbon dioxide annually.

F. DBM State Energy Loan Repayments

SEIF Budget: \$3.5 million

Beneficiaries

State agencies benefit from this program.

Description

In Maryland, general funds normally pay for state agencies' energy bills. To lower those bills, many state agencies are currently participating in energy performance contracts (EPCs). EPCs are intended to be self-funded: the state is supposed to take out loans to pay for energy improvements through the EPC, and the annual energy savings from those improvements are guaranteed to be more than enough to repay those loans. However, instead of using the energy savings to repay the loans, the State has chosen to use SEIF funds to repay the loans, thereby freeing up general funds to address other needs in the State budget.

Program Accomplishments

Investments in this program freed up \$3.5 million of General Funds that otherwise would have to pay State Agencies' energy bills. No energy savings from this program.

CONCLUSION

As evidenced by the programs discussed above, MEA and its partners touch thousands of Marylanders each year with programs funded by the SEIF. Programs help low- and moderate-income homeowners and renters keep the heat on and reduce their monthly energy bills. They help make the clean energy sector in Maryland one of the strongest of any state, with a clean energy workforce that is greater than our iconic blue crab industry.

State Government Article §2-1246 requires that MEA make recommendations for changes to the allocation of SEIF funds. MEA does not recommend any changes to the formula at this time. With the current allocation, MEA and its partners will continue to help thousands of Marylanders, including the most vulnerable populations, each year. These activities will in turn expand the State's energy sector and continue to create well-paying blue-collar jobs.

APPENDIX A

Strategic Energy Investment Fund (SEIF) Expenditures						
Expenditures	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
	Actual	Actual	Actual	Actual	Appropriation	Allowance
RGCI, Inc. Dues	\$220,000	\$450,000	\$ 403,385	\$ 450,000	\$ 450,000	\$ 450,000
Electric Vehicle Tax Credits	\$279,000	\$ 939,600	\$ 1,287,000	\$ 1,287,000	\$ 1,287,000	\$ 1,287,000

Note that in some cases, grantees signed a grant agreement with MEA, but after the end of the fiscal year declined the funding. In those cases, the award amount listed shows \$0. In other cases, certain grantees did not use the full amount of the grant award, and the award amount shows the actual expenditure. Amounts listed are current as of February 2015.
