# State of Maryland 2022 Hate Bias Report

1 October 2023

MP-202308-00255-MCAC

## I. Scope

Public Safety Article Title 2-307 tasks all law enforcement agencies within the State of Maryland and the Office of the State Fire Marshal to provide the Maryland Department of State Police (MDSP) with information relating to incidents seemingly directed against an individual or group because of race, color, religious beliefs, sexual orientation, gender, disability, national origin, or homelessness. In compliance with that requirement, the MDSP, in partnership with the Maryland Coordination and Analysis Center (MCAC), has produced this 2022 Hate Bias Report. It contains an overview of trends in hate bias related incidents within the State of Maryland and gives statistical representation of incidents and their associated victims, offenders, injuries, weapons, and property damage during the calendar year of 2022. This report also includes a historical analysis of total incident data compared with total verified data from the previous 10 years. The information contained is limited to hate or bias incidents that have been reported to a Maryland police agency.

## II. Methodology

The State of Maryland meets the National Uniform Crime Reporting (UCR) requirements via the Maryland Statewide Uniform Crime Reporting Program. This program provides procedures and the collection mechanism for reported hate bias incidents. Maryland police agencies submit hate bias reports via the Maryland Crimes Portal (the portal) to the MDSP Central Records Division. Federal Bureau of Investigation (FBI) UCR Program guidelines captures hate bias crimes based on the victim's color or national origin as Race/Ethnicity/Ancestry (R/E/A).

While the FBI UCR Program compiles hate crime data regarding criminal offenses motivated by the offender's bias, Maryland Public Safety Article Title 2-307 requires the collection of data on hate crimes as well as hate bias incidents which did not result in a crime. This data is analyzed and findings are released to the public in this publication annually. For this reason, the FBI's statistics on hate crimes may differ from Maryland's hate bias statistics.

Incident-based data includes events that are perceived by the victim(s) or investigating law enforcement officer(s) as motivated by hate or bias.

Such incidents may or may not be considered criminal activity. Crime-based data pertains to hate bias related crimes, which are recorded as hate or bias incidents but, more specifically, involve offenses that can result in arrests. Hate crime definitions often encompass not only violence against individuals or groups, but also crimes against property, such as arson or vandalism, particularly those directed against community centers or houses of worship. In order to provide a more comprehensive overview of hate bias related activity in Maryland, crime-based and incident-based data have been combined in this report.

When an incident is reported, the following criteria, among others, can be used to determine if the incident is bias related:

- A review of the totality of the circumstances.
- A review of the motives.
- A display or expression of any bias related symbols, words, or acts.
- The victim's perception and/or statements of any suspect(s) or witness(es).
- A prior history of similar incidents in the same geographic area or against the same victim(s).
- The demographics of the area of occurrence.

Identifying the offender's subjective motivation can make it difficult to distinguish a hate bias related incident. An incident can be verified through an investigation of the accused person or through eyewitness reports of a crime. The determination whether to charge a hate bias incident is at the discretion of law enforcement and prosecutors. The presence of any of the following criteria may be indicators that an incident is hate bias motivated and additional investigation is necessary:

- Similar incidents in or around the same location or neighborhood indicating a possible pattern.

- *Perceptions of the victim(s) and witness(es) about the incident* – This is one of the single most important factors to consider. However, victims may not readily recognize the incident was motivated by bias.
- *Perpetrator’s comments, gestures, or written statements reflect bias* including graffiti, drawings, and symbols used.
- *Differences between perpetrator and victim, whether actual or perceived by the perpetrator* – Victims and perpetrators may appear to be from the same race, ethnicity, or religion but it is the perpetrator’s perception of difference that motivates the behavior constituting an incident.
- Victim was engaged in activities promoting their community or group.
- Incident coincided with a holiday or date of particular significance to a group.
- Localized activities of organized hate group or the absence of any other motive(s) such as economic gain.

Some incidents are not clearly identified as hate bias. However, investigative efforts may reveal the incident is hate bias motivated. Depending on the outcome of the follow-up investigation, hate bias incidents are classified as verified, inconclusive, or unfounded.

- *Verified Incident* – An incident committed against a person or property where the investigation leads a reasonable and prudent person to conclude that the offender actions were motivated, in whole or in part, by bias against a person’s race/ethnicity/ancestry (R/E/A), religion, sexual orientation, disability, gender, gender identity, or homelessness.
- *Inconclusive Incident* – An incident where the evidence is conflicting, incomplete, or otherwise insufficient to classify as verified.
- *Unfounded Incident* – An incident in which the evidence or investigation definitively indicates that it was not motivated by bias against a person’s R/E/A, religion, sexual orientation, disability, gender, gender identity, or homelessness or that the incident did not occur.

#### **Data Declaration**

The data behind this analysis comes from submissions to the Maryland Crimes Portal. Maryland law enforcement agencies are required to submit data to the portal when a

hate bias incident is reported. The portal collects information on date, time, incident type, bias motivation, clearance, victim and offender demographics, location, weapons used, injuries, value of property damage, and a written summary of the incident, amongst other things.

In 2012, Maryland added Homelessness as a protected category under the hate bias statute. In 2015, Gender and Gender Identity were also added. These additions have not made a significant impact on overall reporting as R/E/A, Religion, and Sexual Orientation largely account for bias motivations from the previous 10 years.

Other revisions to categories have included:

- Victim and offender race category was revised to White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander, multiple races or unknown.
- The revised ethnicity categories are Hispanic or Latino, Not Hispanic or Latino, multiple ethnicities or unknown.
- The following religious bias types were added: Anti-Buddhist, Anti-Eastern Orthodox (Greek, Russian, etc.), Anti-Hindu, Anti-Jehovah’s Witness, Anti-Mormon, Anti-Other Christian, and Anti-Sikh.
- Bias Motivation Code categories were revised to include: R/E/A, Religion, Sexual Orientation, Disability, Gender, and Gender Identity. The previous Bias Motivation Code, Ethnicity (alone), was eliminated. Other codes, including those for Location and Property Damage Type, were updated as well.

The reports are submitted to the MDSP’s Central Records Division as mandated by law and then provided to the MCAC. If a hate bias incident occurs and is not reported to law enforcement, an incident report is not filled out and not submitted. All information included in this report is analyzed based solely on the contents of the data submitted to the MDSP. This analysis is current as of 1 July 2023. Incident reports from 2022 received after 1 July 2023 will be reflected in the 2023 Hate Bias Report.

No specific addresses or locations are collected other than the ZIP Code of where the incident took place. No names or personal identifiable information are reported to maintain confidentiality. All percentages are rounded to the nearest tenth of a percent.

### III. Executive Summary

There were a total of 465 hate bias incidents reported by Maryland law enforcement agencies during the 2022 reporting period.

#### Key Findings

The following statistics account for all incident types: verified, inconclusive, and unfounded.

- Maryland experienced an average of 412 hate bias incidents each year from 2020 - 2022. The average number of verified incidents for the same period was 111.
- In 2022, R/E/A, as a category, was the most common hate bias motivation accounting for 61.5% of all incidents. On average, R/E/A accounted for 67.3% of all incidents reported from 2020 - 2022.
- Black males as victims of hate or bias accounted for 24.4%, followed by Black females at 20.7%, and White males at 19.0%.
- White males account for 28.8% of offenders and Black males account for 12.0%. Offender race and gender are not identified in 36.4% of all reports.
- Juveniles made up 19.2% of known victims and 17.1% of known offenders of all reports.
- The highest number of incidents occurred in the month of May (10.3%) while the lowest occurred in February (6.2%) with an average of 38.8 reports per month.
- The location of 21.5% of all hate bias reporting, occurred at a residence/home while school-elementary/secondary had 19.4% and highway/road/alley/street/sidewalk had 15.3% of incidents.
- Twenty-five incidents were reported at a house of worship with seventeen specifically targeting religion. The other eight involved a bias against the victims' race or sexual orientation.
- In a ten-year period, Talbot and Calvert Counties have reported no hate bias incidents, Caroline and Worcester counties reported one each, and Garrett County reported two.
- Twenty-nine incidents involved communications that may have originated outside of the state.

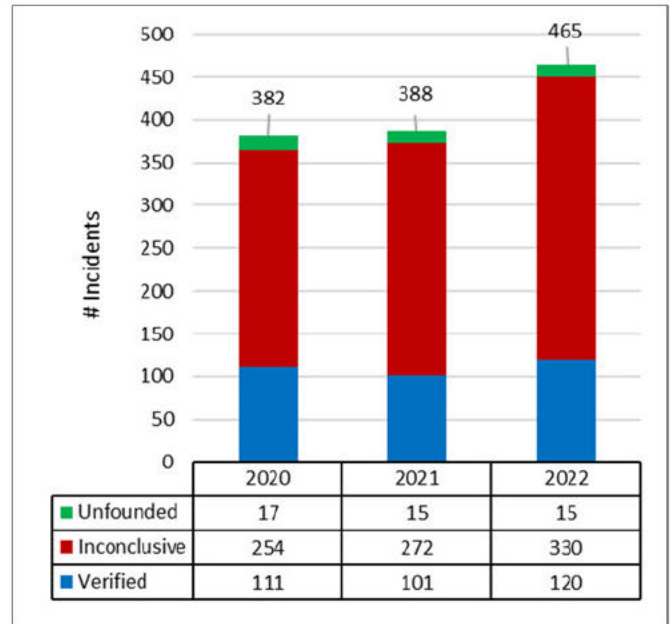

Figure 1: This is a comparison of verified, inconclusive, and unfounded reports for the last three years.

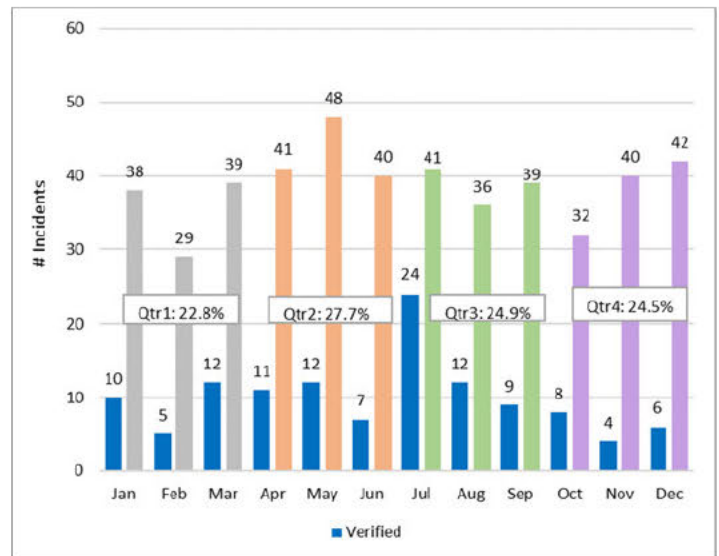

Figure 2: Verified and all incident reporting by month for 2022 are depicted here.

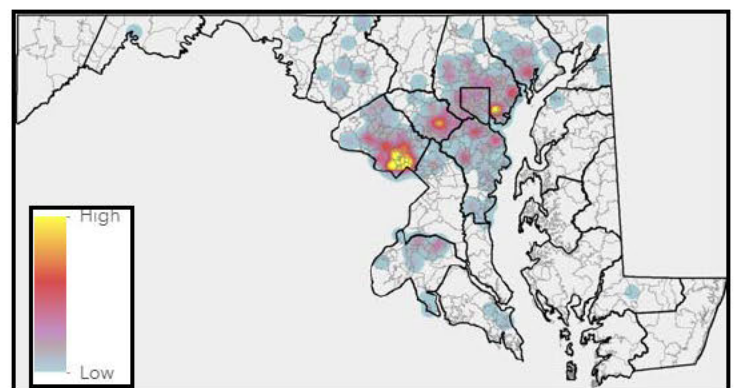

Figure 3: This heat map represents all hate bias incidents reported in 2022.

### IV. Analysis by Category

#### Crime/Incident Classification

Crime/Incident Classification is denoted based on UCR crime codes and non-criminal incident codes. Vandalism, verbal intimidation and other hate bias incidents make up 29.6%, 24.6%, and 18.3% of crime/incident classifications reported.

When inconclusive and unfounded data points are removed from analysis for 2022, the following trends are observed:

- Over three-quarters (75.6%) of the verified incidents consisted of other hate bias incidents, vandalism, or simple assault.
- Of the 123 verified incidents reported, 22.8% involved some form of assault, robbery or arson.

Crime/Incident Classification	Verified	All Reports
All Other Offenses	2	9
Arson	3	4
Assault-Firearm-Aggravated Injury	3	6
Assault-Hands, Fist, Feet-Aggravated Injury	1	4

Written Intimidation	4	32
<b>Total</b>	<b>123</b>	<b>476</b>

Figure 4: Crime/Incident Classification for all reported incidents in 2022 compared to verified incidents. Some incidents reported more than one crime classification. A total of 476 separate crime/incident classifications were reported for 465 incidents.

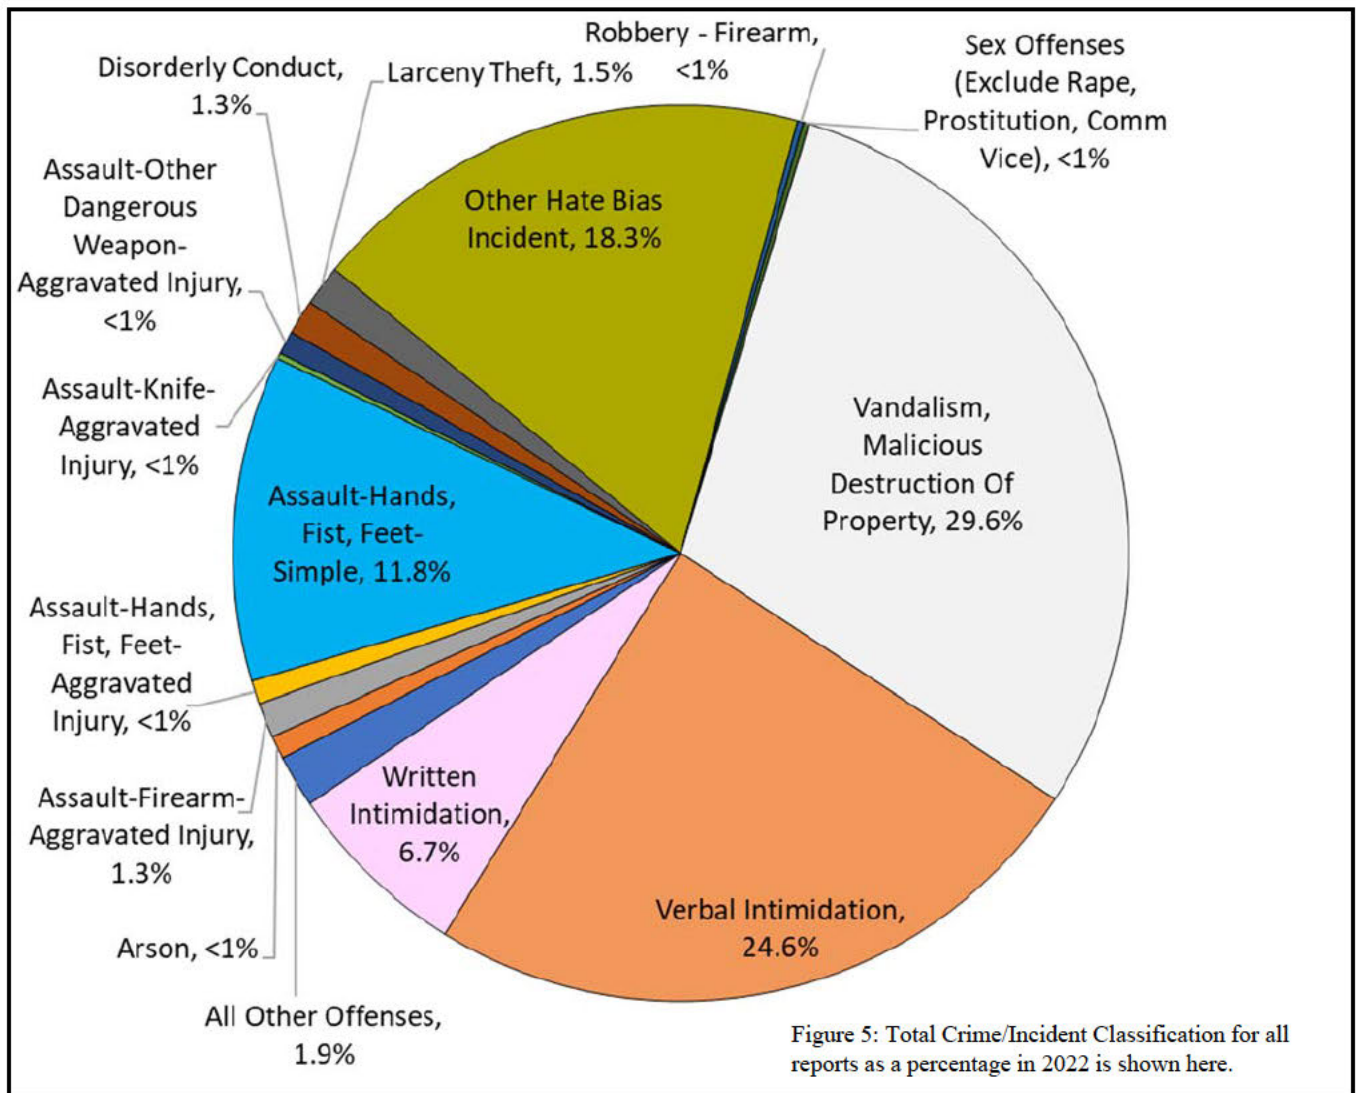

Figure 5: Total Crime/Incident Classification for all reports as a percentage in 2022 is shown here.

**Bias Motivation**

From 2021 to 2022, R/E/A bias motivations increased 12.7% from 276 to 311. Anti-Religion bias motivations increased by over 84.5% during the same period from 57 to 105.

Between 2020 - 2022, R/E/A bias motivations comprised the majority of all hate bias motivations followed by Religion and Sexual Orientation.

Category	Verified			All Reports

Figure 8: Verified and total bias motivations by subcategory from 2020 through 2022 are shown here.

**Victims**

Victim type is categorized into Individual, Business, Financial Institution, Government, Religious Organization, Other, and Unknown. When reporting victim information, all pertinent victim information is recorded, including, but not limited to: age, sex, ethnicity, religion, and sexual orientation. If reporting an event concerning a religious building, for example, the religious affiliation would be pertinent information. Of all reported incidents in 2022, 70.3% victims categorized as Individual, followed by Government (8.6%), Other (8.2%), Business (5.2%), Religious Organization (5.2%), and Unknown (1.7%). Four incidents indicated multiple victim types which accounted for 0.9% of the total incidents for 2022.

**Offenders**

A hate bias incident can be caused by a single individual, a group of individuals, or a representative of a hate group. For 2022, 43 incidents reported two or more offenders.

Five verified incidents involved hate group ideology or symbols associated with Klu Klux Klan, Patriot Front, Proud Boys, or Nazi ideology.

During 2022, twenty-nine incidents involved the internet, mobile phone, or social media communication by the offender. Of these, six were verified.

Figure 9: Victim and offender demographics for 2022 are shown here.

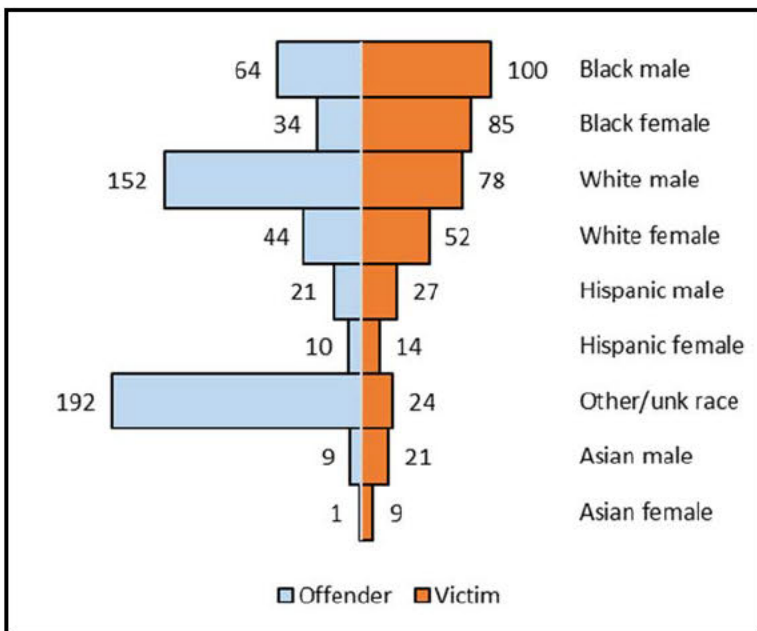

Figure 10: Comparison of race and gender for 2022 victims and offenders.

**Location of Incidents**

There were 28 location types reported for 2022. Of all incidents reported, 21.5% occurred at a residence/home, 19.4% occurred at school-elementary/secondary, and 15.3% occurred on a highway/road/alley/street/sidewalk.

**Weapons**

In 2022, 80 reports indicated the use of a weapon. In terms of verified incidents, 28 reported the use of a weapon.

Not all reports indicated a specific type of “personal” weapon used. In other cases, an incident was reported as a simple assault using hands and feet.

**Arrests**

According to reports submitted by law enforcement, 40 incidents were closed by arrest in 2022, 30 in 2021, and 34 in 2020.

**Damages**

In many cases, the damage cost is reported as unknown. Estimated damage costs incurred for 71 incidents totaled \$51,435.00. Sixty-three of these incidents included some form of vandalism.

- ± Percent of total incidents.
- \* Percent of verified over total incidents reported by county.
- \*\* Percent of inconclusive over total incidents reported by county.
- \*\*\* Percent of unfounded over total incidents reported by county.

**County Trends**

- Over three-quarters (78.9%) of all hate bias reporting in Maryland during 2022 was received from four counties: Anne Arundel (57), Baltimore (98), Howard (53), and Montgomery (159).
- No hate bias reports were submitted by the following counties: Calvert, Caroline, Carroll, Dorchester, Garrett, Queen Anne’s, Somerset, Talbot, and Worcester. As such, they are not represented in Figure 14.
- The ZIP Code with the highest number of hate bias incidents reported in 2022 was 21222 in Baltimore County with 19. The next three highest number hate bias incidents were reported in Montgomery County ZIP Codes: 20852 (17), 20817 (16), and 20910 (14).

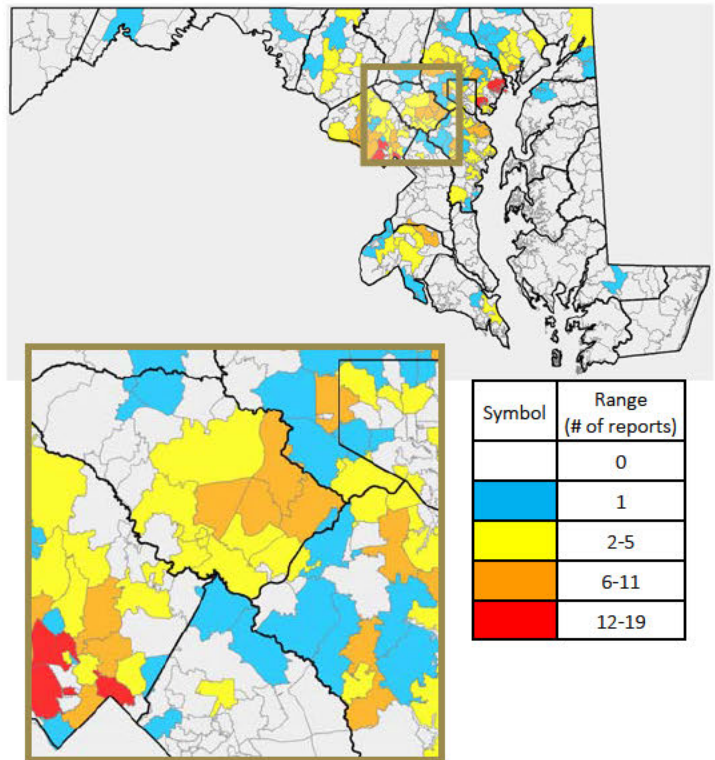

Figure 15: Highlighted here are all hate bias reports in 2022 by ZIP Code.

## V. Ten Year Summary

Figure 16 reflects the number of hate bias incidents and year to year change in reporting for the previous ten years. The highest total incidents occurred in 2022 with 465. The lowest total incidents reported occurred in 2014 with 155.

In Figure 17, linear trend lines for all reports indicate an upward trend. Although the trend in verified hate bias reporting is on a slight upward trend, the rate of increase is significantly less compared to total reporting.

It is important to note there were additions to protected categories such as homelessness in 2012 along with gender and gender identity in 2015.

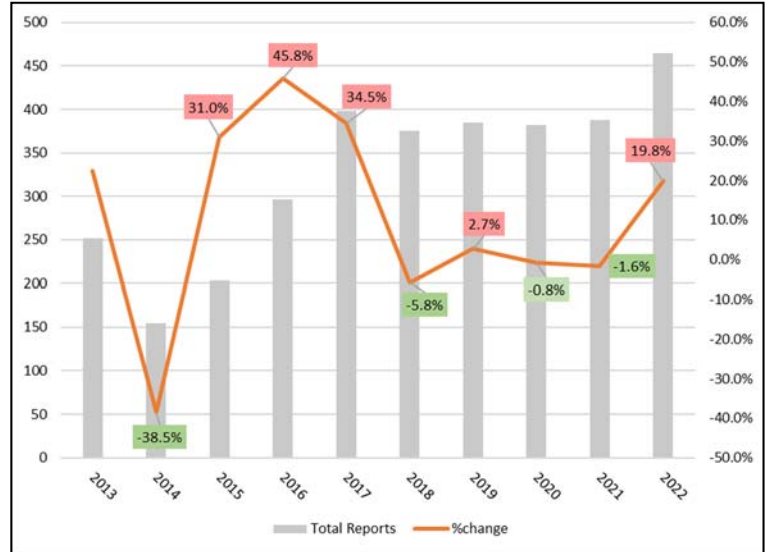

Figure 16: Shown here is the percent change by year of total reporting.

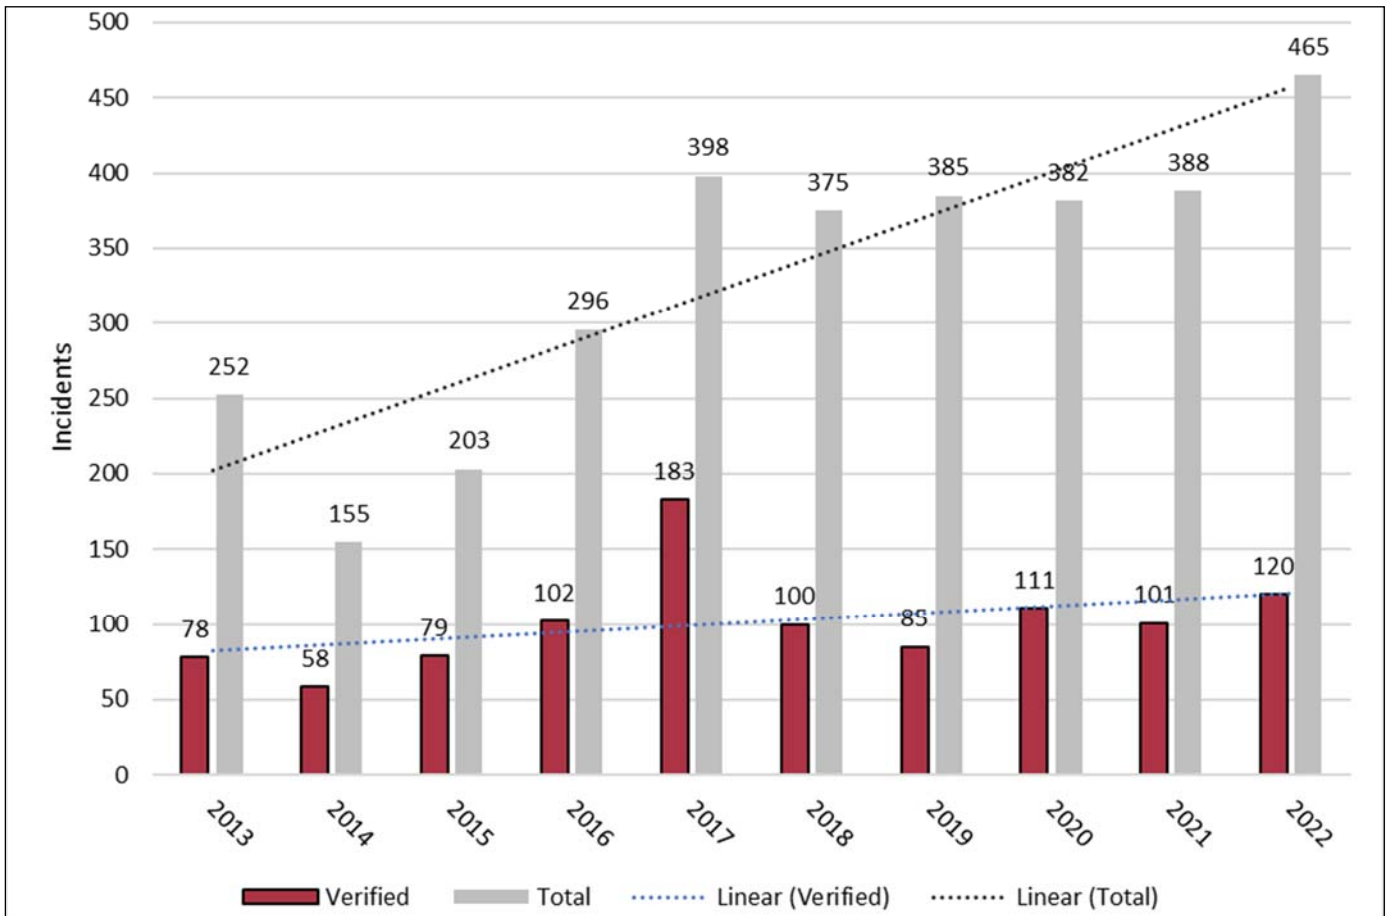

Figure 17: This shows a comparison of verified incidents and all reports from 2013 - 2022.

County	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022

Figure 18: This shows the total reports submitted per county from 2013 - 2022. N/0 indicates no reports submitted or zero reports of hate bias incidents.

## Reporting by County

Between 2013 - 2022, two counties reported no hate bias incidents. This does not suggest that having zero hate bias incidents means no hate bias incidents have occurred.

## VI. Considerations

In summary, law enforcement and other human relations agencies across the state should continue to monitor hate bias related problems in their communities. Maryland citizens and law enforcement agencies must continually be diligent in reporting hate bias incidents. Law enforcement personnel are often the first to arrive on the scene of hate bias incidents. In order to meet the needs of the community, training on the recognition, investigation, and reporting of potential hate bias crimes and incidents remains important. It is equally important to encourage the cooperation of law enforcement and the community in addressing hate bias. The concept of community policing throughout Maryland should

continue to incorporate hate bias related issues.

If additional information is required concerning this report, please contact the Maryland Coordination and Analysis Center at 1-800-492-8477.

## VII. Summary of Hate Crime Laws

Anti-hate crime acts impacting Maryland include the following:

*The Matthew Shepard and James Byrd, Jr. Hate Crimes Prevention Act* - On 28 October 2009, President Obama signed this piece of legislation into law. It is attached to the National Defense Authorization Act for fiscal year 2010.<sup>ii</sup> This law expanded existing United States federal hate crime law to include crimes motivated by a victim's actual or perceived gender, sexual orientation, gender identity, or disability, and dropped the prerequisite that the victim be engaging in a federally protected activity.

*Hate Crimes Prevention Act of 1999* - This act prohibits persons from interfering with an individual's federal rights (e.g., voting or employment) by violence or threat of violence due to race, color, religion, or national origin. This act allows more authority for the Federal Government to investigate and prosecute hate crime offenders who committed their crime because of perceived sexual orientation, gender, or disability of the victim. It also permits the Federal Government to prosecute without having to prove that the victim was attacked because the victim was performing a federally protected activity.

*Campus Hate Crimes Right to Know Act of 1997* - This act requires campus security/police authorities to collect and report data on hate crimes committed on the basis of race, gender, religion, sexual orientation, ethnicity, or disability.

*The Church Arson Prevention Act of 1996* - This act created the National Church Arson Task Force (NCATF) in June 1996 to oversee the investigation and prosecution of arson at houses of worship around the country. The NCATF has brought together FBI, Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATF), and Department of Justice prosecutors in partnership with State and local law enforcement officers and prosecutors. In addition to the NCATF's creation, the law allowed for broader federal criminal jurisdiction to aid criminal prosecutions and established a loan guarantee recovery fund for rebuilding.

*The Hate Crimes Sentencing Enhancement Act* - As a part of the 1994 Crime Act, the Hate Crimes Sentencing Enhancement Act provides for longer sentences when the offense is determined to be a hate crime. A longer sentence may be imposed if it is proven that a crime against a person or property was motivated by "race, color, religion, national origin, ethnicity, gender, disability, or sexual orientation."

*The Hate Crimes Statistics Act of 1990* - This act requires the Department of Justice to collect data on hate crimes. Hate crimes are defined as "manifest prejudice based on race, religion, sexual orientation, or ethnicity." The FBI compiles these statistics using the Uniform Crime Reporting (UCR) system. The Crime Act of 1994 also requires the FBI to collect data on hate crimes involving disability.

*Maryland Code Public Safety § 2-307* - "(a) The Department shall collect, analyze, and disseminate information about the incidence of crime in the State. (b) (1) The Department shall collect and analyze

information about incidents apparently directed against an individual or group because of race, religion, ethnicity, or sexual orientation.

Maryland extended hate crimes protection to homeless people under a bill signed on 7 May 2009. The bill added homelessness to the protected categories under Maryland's hate crimes law, allowing prosecutors to seek tougher penalties as they do for those who target people because of factors such as race, ethnicity, religion, and sexual orientation.<sup>iii</sup>

In 2019, Public Safety Article 20 Section 2–307 modified hate bias reporting requirements to collect and analyze incidents directed against an individual or a group because of color, religious beliefs, sexual orientation, gender, disability, national origin, or homelessness.

*Maryland Code Criminal Law Subtitle 3 § 10-304* added homeless persons and groups and gender to the protected classes under State hate crime statutes. "Because of another's race, color, religious beliefs, sexual orientation, gender, disability, or national origin, or because another is homeless, a person may not: (1-i) commit a crime or attempt to commit a crime against that person; (1-ii) damage the real or personal property of that person; (1-iii) deface, damage, or destroy, or attempt to deface, damage, or destroy the real or personal property of that person; or (1-iv) burn or attempt to burn an object on the real or personal property of that person."

In March 2014, the Maryland General Assembly passed legislation adding "transgender" people to the list of protected classes. The law prohibits discrimination based on gender identity in housing and employment, in obtaining credit, and in access to public accommodations. This law took effect on 1 October 2014.<sup>iv</sup>

In 2020, Criminal Law Section 10–305.1 was modified, and now prohibits a person from using an item or symbol, including a swastika or a noose, to threaten or intimidate another, creating criminal and monetary penalties.

Maryland General Assembly modified the same section again redefining gender identity to align with the definition with other laws.

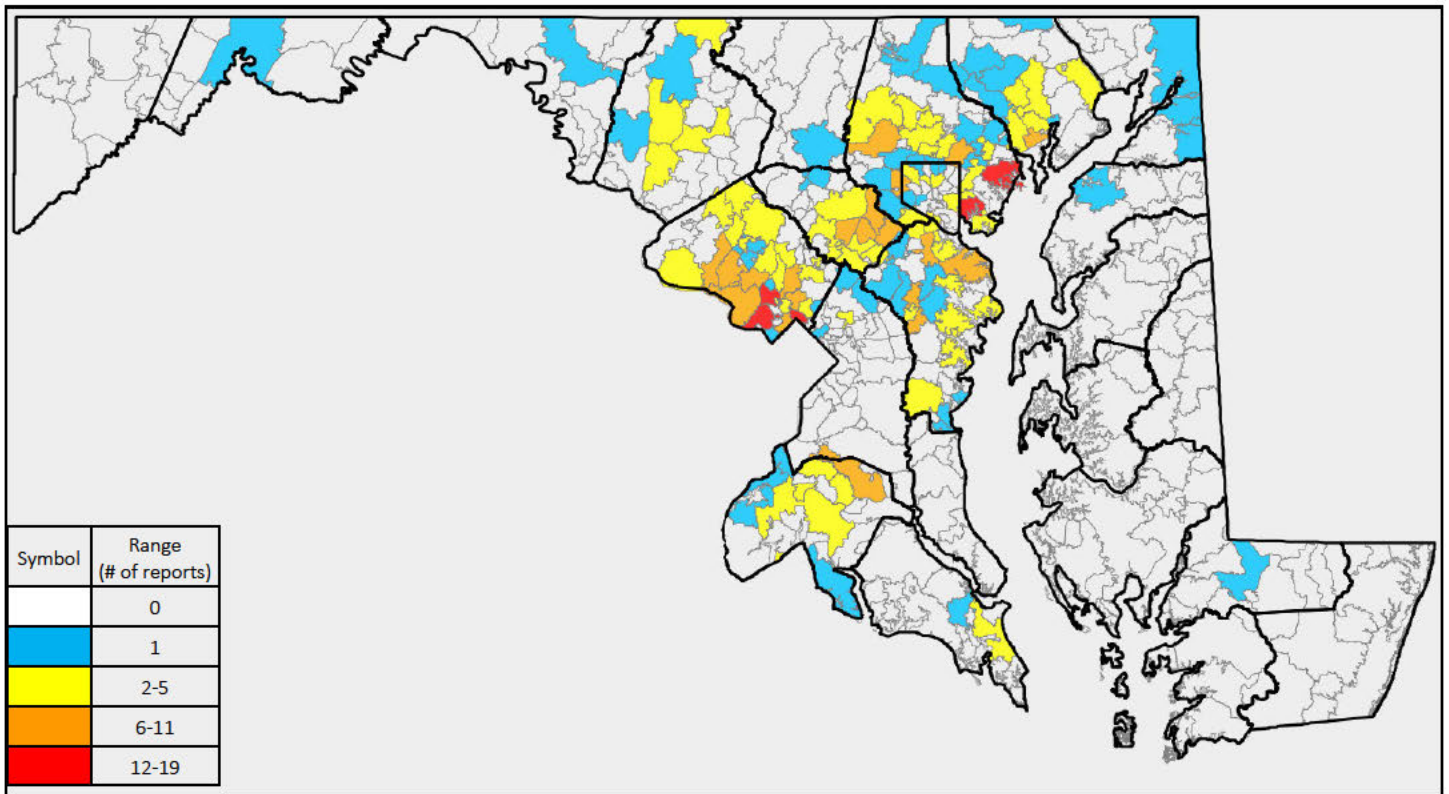

Figure 15 (Enlarged from page 11): Highlighted here are all hate bias reports in 2022 by ZIP Code.

This product was developed by the Maryland Department of State Police in partnership with the Maryland Coordination and Analysis Center.

The data behind this report comes from the Maryland Supplementary Hate Bias Incident Reporting, which is mandated for all Maryland law enforcement agencies to complete when a hate bias incident is encountered. The requirement collects information on date, time, incident type, bias motivation, clearance, victim and offender demographics, location, weapons used, injuries, value of property damage, and a written summary of the incident, amongst other things.

The information reported is based on individual agency policy and procedures, as well as the individual officer's level of training and expertise. The reports are collected by the Maryland Department of State Police Central Records Division as mandated by law and are then provided to the MCAC. If a hate bias incident occurs and is not reported to law enforcement, an incident report is not filled out and is not submitted. All incidents included in this analysis are counted as to what they are marked upon their most current receipt. This analysis is current as of 1 July 2023. Incident reports received after 1 July 2023 will be reflected in the 2023 report.

Assistance from the Maryland State Police and the Maryland Coordination and Analysis Center is available to any law enforcement agency that collects the information for investigative and reporting purposes.
