The Maryland Insurance Administration (MIA) requires insurers, nonprofit health service plans, health maintenance organizations, managed care organizations, and third-party administrators to report the number of lives and contracts for health benefit plans for those under the age of 65 as of a specified date.¹ “Health benefit plans” (HBP) include policies for hospital or medical benefits. They do not include such coverage as accident-only insurance, credit health insurance, disability income insurance, coverage issued as a supplement to liability insurance, workers’ compensation, automobile medical payment insurance, dental insurance, vision insurance, long-term care insurance, disease-specific insurance, hospital indemnity or other fixed indemnity insurance, or a Medicare supplement policy as defined in §15-901 of the Annotated Code of Maryland.

There are two types of health benefit plans comprising the commercial market: insured health benefit plans and other employment-based health benefit plans. Insured health benefit plans include group insured health benefit plans and individual insured health benefit plans. Insured health benefit plans are regulated by the MIA and subject to Maryland law. Other employment-based health benefit plans include group self-insured health benefit plans and the Federal Employees Health Benefit Plan (FEHBP). These health benefit plans are not regulated by the MIA and, for the most part, are not subject to Maryland law.

In the health insurance industry, the covered life (member) is the fundamental unit of measurement. Trends regarding number of contracts generally track those regarding numbers of covered lives.

Observations

Table 1: Covered Lives by Type of Health Benefit Plan under Age 65

In 2020, approximately 2.77 million Maryland residents under the age of 65 had health insurance through a commercial health benefit plan, representing an increase of approximately +2.9% in total covered lives as compared with 2019. The number of covered lives is composed of 826,665 lives in fully insured health benefit plans and 1,943,366 lives in all other employment-based, self-insured health benefit plans.

The number of covered lives in the group insured market decreased from 696,081 to 604,517. This is a decrease of 91,564 covered lives, or approximately -13.2%. The individual non-Medigap insured market increased from 210,125 to 222,148. This is an increase of 12,023 covered lives, or approximately +5.7%. The overall number of covered lives in insured health benefit plans decreased from 906,206 covered lives in 2019 to 826,665 covered lives in 2020, or approximately -8.8%.

The number of covered lives in the group self-insured market increased from 1,354,031 to 1,499,670. This is an increase of 145,639 covered lives, or approximately +10.8%. The number of covered lives in the FEHBP market increased from 432,952 covered lives in 2019 to 443,696 covered lives in 2020, or approximately +2.5%. The overall number of covered lives in other employment-based health benefit plans increased from 1,786,983 lives in 2019 to 1,943,366 covered lives in 2020, or approximately +8.8%.

Conclusion

As of 2020, the MIA regulates and Maryland state law applies to commercial health benefit plans for approximately 16.3% of the population under the age of 65, and for approximately 29.9% of all covered lives. Lastly, this year we asked 195 carriers to voluntarily answer a data call with further detail about enrollment in our state. The results of replies from 125 carriers are compiled on the following page.
