EXECUTIVE SUMMARY

In 2020, progress on the execution of the 21st Century School Buildings Program (Program) continued in a successful manner. The Maryland Stadium Authority (MSA) and Baltimore City Public Schools (City Schools) are jointly responsible for the effective delivery of this complex program.

The original goal of the Program was to deliver a projected 23-28 replacement and/or renovated schools by 2020. Due to efficient project management and financial transactions on the bond issuances, we now forecast that this program will deliver 28 school buildings. The program remains on schedule to be substantially complete in 2021, with a few buildings carrying out into 2022/2023 due to swing space conflicts.

It is important to note that four of the new or substantially renovated school buildings contain more than one school. Therefore, while the Program will deliver 28 new or renovated school buildings, the buildings will house 32 schools. Concurrent with this mission is the planned reduction by City Schools of 26 school facilities from the inventory in order to right-size the portfolio, thereby increasing District-wide utilization by the end of the program.

Currently, 17 school buildings housing 19 schools have been completed, with seven under construction, three in design, and one finalizing the feasibility study phase. Regarding local hiring, 948 positions in Baltimore City have been filled with local candidates to date – exceeding the 369-position commitment originally anticipated from our contracts. From a procurement perspective, a total of \$1.06 billion has been contracted to date, with \$352 million of MBE contracts equating to 33.1 percent MBE participation.

As previously reported, MSA implemented an Owner Controlled Insurance Program (OCIP) encompassing 17 of the 28 projects. Based on verified contractor credits, the OCIP has currently achieved savings of \$4.3 million, as well as a greater pool of trade contractors and safer project sites.

Additionally, as a result of efficient project management and recent bond issuance transactions, the MSA is forecasting that there will be an additional \$60 million available for future school funding.

We anticipate that capacity will be available in FY21 to undertake additional work at our current staffing level. Our Program will begin downsizing in FY22 if additional projects are not assigned.

INTRODUCTION

The Maryland Stadium Authority, Baltimore City Public Schools (City Schools), the City of Baltimore (City), and the Interagency Commission on School Construction (IAC) present this annual program progress report to the Board of Public Works and the Maryland State Legislature on work related to the 21st Century School Buildings Program, in accordance with the Baltimore City Public Schools Construction and Revitalization Act of 2013.

PROGRAM UPDATE

This section provides a summary of the progress of projects, enrollment projections, and annual portfolio planning requirements for the 21st Century School Buildings Program.

Plan Year 1 Schools: Progress Update

Plan Year 1 projects progressed significantly during 2020. As of the time of this report, two schools opened in the summer of 2017, two opened in the spring of 2018, five opened in the summer of 2018, one opened in the summer of 2019, and the final project is nearing the completion of construction.

Table 1. Plan Year 1 Program Summary

Plan Year 1 Program Summary			
School/Building	Project Type	Program Phase	
Frederick	Renovation + Addition	Occupied	
Fort Worthington	Replacement	Occupied	
Wildwood	Renovation + Addition	Occupied	
Dorothy I. Height	Renovation + Addition	Occupied	
Robert Poole Building	Renovation + Addition	Occupied	
The Historic Cherry Hill	Renovation + Addition	Occupied	
Arundel	Replacement	Occupied	
Forest Park	Renovation + Addition	Occupied	
Pimlico	Renovation + Addition	Occupied	
Arlington	Renovation + Addition	Occupied	
Patterson Building	Replacement	Construction	

Plan Year 1 Project Budget Status Details

The summary for the program is provided as **Exhibit 1** and includes project budget and bid information details for the Plan Year 1 schools in the program.

Plan Year 1 Schools: Project Updates

Frederick Elementary School (PK-5) – This 84,961 sq. ft. renovation and addition project opened September 5, 2017. Students, including those from a closed school, Samuel F.B. Morse, occupy the school.

Photos courtesy of Carlos Tovar, USA Architects; Frederick Elementary School exterior and classroom

Fort Worthington Elementary/Middle School (K-8) – This 103,351 sq. ft. replacement project opened September 5, 2017. Students, including those from a closed school, Dr. Rayner Browne, occupy the school.

Photos courtesy of Grimm + Parker Architects; Fort Worthington exterior and collaborative area

Wildwood (formerly Lyndhurst) Elementary/Middle School (PK-8) – This 110,355 sq. ft. renovation with addition project opened on April 4, 2018. Students, including those from a closed school, Rognel Heights, occupy the school.

Photos courtesy of STV Inc. (Structural Engineering Firm); Wildwood exterior and cafetorium

Dorothy I. Height (formerly John Eager Howard) Elementary School (PK-5) – This 91,346 sq. ft. renovation with addition project opened on April 4, 2018. Students, including those from a closed school, Westside, occupy the school.

Photos courtesy of Cho Benn Holback + Associates; Dorothy I. Height exterior and grand stair

Robert Poole Building – The Robert Poole Building houses two school programs: The Academy for College and Career Exploration (ACCE) and Independence School Local 1 High (Independence). This 135,896 sq. ft. renovation with addition project opened August 27, 2018 for Independence students and September 4, 2018 for ACCE students.

Photos courtesy of Alain Jarmillo; Robert Poole Building exterior and learning stairs

The Historic Cherry Hill Elementary/Middle School (3-8) – This 129,509 sq. ft. renovation with addition project, along with the Arundel PK-2 School project, opened September 4, 2018. Students, including those from a closed school, Dr. Carter G. Woodson, occupy the school.

Photo courtesy of 21st Century School Buildings Program; The Historic Cherry Hill exterior Photo courtesy of Sam Kittner; The Historic Cherry Hill cafetorium

Arundel Elementary School (PK-2) – This 113,647 sq. ft. replacement school project, along with the Cherry Hill 3-8 project, opened September 4, 2018. Students, including those from a closed school, Dr. Carter G. Woodson, occupy the school.

Photos Courtesy of 21st Century School Buildings Program; Arundel exterior and media center

Forest Park High School (9-12) – This 199,785 sq. ft. renovation with addition project opened September 4, 2018. Students, including those from a closed school, Northwestern, occupy the school.

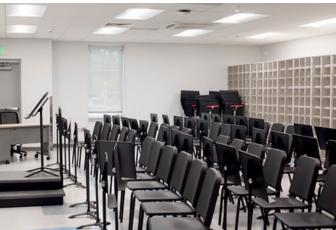

Photos courtesy of Lester Escobal, SEI Architects; Forest Park exterior and competition pool

Pimlico Elementary/Middle School (PK-8) – This 119,015 sq. ft. renovation with addition project opened September 4, 2018. Students, including those from a closed school, Langston Hughes, occupy the school. Middle-grade students from a reconfigured Arlington began attending in 2019.

Photos courtesy of 21st Century School Buildings Program: Pimlico exterior and music room

Arlington Elementary School (PK-5) – This 102,300 sq. ft. renovation with addition project opened September 3, 2019. Students, including those from a closed school, Langston Hughes, occupy the school. The building also houses a Harry and Jeanette Weinberg Foundation Early Childhood Development Center.

Photos courtesy of 21st Century School Buildings Program; Arlington exterior and classroom

Patterson Building – This 242,019 sq. ft. replacement school will co-locate two programs: Patterson High School, a traditional high school, and Claremont Middle/High School, a separate, public day school. Construction started in July 2019 with the new building (the first of two phases) scheduled to be complete in summer 2021.

Rendering courtesy of Stantec; Patterson Building

Plan Year 2 Schools: Progress Update

The 17 proposed Plan Year 2 projects include one PK-2 school, one grade 3-8 school, seven PK-5 schools, seven PK-8 schools, and one high school program, as shown in Table 2. Additionally, one PK-8 and one PK-5 special education program will be co-located at two of the 17 buildings. Plan Year 2 projects progressed significantly during 2020. As of the time of this report, one school opened in the summer of 2020 and two schools reached substantial completion in December 2020. The order of Plan Year 2 Schools, originally established in 2014, was changed to respond to changing school enrollments and facility conditions as well as uncertain market conditions. Current schedules are provided in **Exhibit 2.**

Table 2. Plan Year 2 Program Summary

Plan Year 2 Program Summary			
School	Project Type	Program Phase	Expected Phase Completion
Govans	Replacement	Construction	August 2021
John Ruhrah	Renovation & Addition	Occupied	N/A
Medfield Heights	Replacement	Occupied	N/A
Harford Heights	Renovation & Addition	Construction	August 2021
Calverton	Replacement	Construction	August 2021
Cross Country	Replacement	Restarting Design	December 2021
The Lake Clifton Park Building (formerly Fairmount-Harford Building)	Renovation & Addition	Occupied	N/A
Robert W. Coleman	Renovation	Construction	August 2021
Bay-Brook	Replacement	Occupied	N/A
Calvin M. Rodwell	Replacement	Occupied	N/A
Commodore John Rodgers	Renovation & Addition	Feasibility Study	March 2021
Highlandtown (#237)	Minor Renovation & Addition	Design	March 2021
James Mosher PK-2	Renovation & Addition	Construction	August 2021
Montebello	Renovation	Design	December 2020
Northwood	Replacement	Construction	December 2021
Mary E. Rodman	Renovation & Addition	Occupied	N/A
Walter P. Carter Building	Replacement	Occupied	N/A

Plan Year 2: Project Budget Status Details

The summary for the program is provided as **Exhibit 1** and includes project budget and bid information details for the Plan Year 2 schools in the program.

Plan Year 2 Schools Updates

John Ruhrah Elementary/Middle School (PK-8) – This 143,613 sq. ft. renovation with addition project, necessitated by enrollment growth in East Baltimore, opened for students January 6, 2020.

Photos courtesy of 21st Century School Buildings Program; John Ruhrah exterior and classroom

The Lake Clifton Park Building (Formerly Fairmount-Harford Building) — This 165,314 sq. ft. design/build renovation with addition project opened for students September 3, 2019. The building provides a renovated facility for The REACH! Partnership School, formerly located in the Lake Clifton Building, allowing City Schools to close and surplus the Lake Clifton Building.

Photos courtesy of ©Judy Davis/studioHDP; Lake Clifton Park Building exterior and CTE space

Bay-Brook Elementary/Middle School (PK-8) – This 115,945 sq. ft. replacement school, necessitated by enrollment growth in the Curtis Bay/Brooklyn area of the City, opened for students January 6, 2020. The building will also serve middle school students from Curtis Bay Elementary/Middle School, which is being converted to serve grades PK – 5.

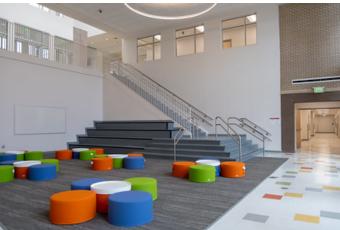

Photos courtesy of Crabtree, Rohrbaugh & Associates; Bay-Brook exterior and art room

Calvin M. Rodwell Elementary/Middle School (PK-8) – This 111,694 sq. ft. replacement school project includes students from a closed school, Grove Park. The school opened for students January 6, 2020.

Photos courtesy of 21st Century School Buildings Program; Calvin M. Rodwell exterior and collaborative area

Mary E. Rodman Elementary School (PK-5) – This 81,488 sq. ft. renovation with addition project includes students from a closed school, Sarah M. Roach. The school opened for students August 26, 2020.

Photos courtesy of Lester Escobal, SEI Architects; Mary E. Rodman exterior and gym

Medfield Heights Elementary School (PK-5) – This 79,899 sq. ft. replacement school project, necessitated by enrollment growth in North Baltimore, opened for staff on January 6, 2021.

Photos courtesy of Baltimore City Public Schools; Medfield Heights exterior and collaborative area

Govans Elementary School (PK-5) – This 87,260 sq. ft. replacement school will absorb students from closing school Guilford. Students are located in temporary swing space at the Chinquapin Building. Construction started in April 2020 and is scheduled to be complete in summer 2021.

Rendering courtesy of USA Architects; Govans Elementary School

Walter P. Carter Building – This 149,953 sq. ft. replacement school project will absorb students from closing school Guilford and will co-locate two school programs, Walter P. Carter, a traditional PK-8 school and Lois T. Murray, a separate PK-8 public day school program. The building opened for staff on January 6, 2021. Lois T. Murray students will remain in their current school building until summer 2021.

Photos courtesy of Whiting-Turner Contracting Company; Walter P. Carter Building exterior and classroom

Calverton Elementary/Middle School (3-8) – This 122,525 sq. ft. replacement project will absorb students from a closing school, Alexander Hamilton, and a reconfigured school, James Mosher. Students are located in temporary swing space at the West Baltimore Building. Construction started in November 2019 and is scheduled to be complete in summer 2021.

Rendering courtesy of JRS Architects; Calverton Elementary/Middle School

James Mosher Elementary School (PK-2) – This 75,611 sq. ft. renovation with addition project will absorb students from closing school, Alexander Hamilton, and reconfigured school, Calverton. Students are located in temporary swing space at the Garrison Building. Construction started in April 2020 and is scheduled to be complete in summer 2021.

Rendering courtesy of Walden Hughes Partnership; James Mosher Elementary School

Harford Heights Building - This 144,290 sq. ft. replacement school project will co-locate two school programs, Harford Heights Elementary, a traditional PK-5 school and Sharp-Leadenhall, a separate PK-5 public day school program. Harford Heights students are currently in temporary swing space at the William C. March Building. Sharp-Leadenhall students will remain in their current school building until the new building is completed. Construction started in April 2020 and is scheduled to be complete in summer 2021.

Rendering courtesy of Crabtree, Rohrbaugh & Associates; Harford Heights Building

Robert W. Coleman Elementary School (PK-5) – This 52,528 sq. ft. renovation with addition project will absorb students from closed school zone, Westside Students are located in temporary swing space at the Harriet Tubman Building. Construction started in April 2020 and is scheduled to be complete in summer 2021.

Rendering courtesy of RRMM Architects; Robert W. Coleman Elementary School

Northwood Elementary School (PK-5) – This 100,213 sq. ft. replacement project was necessitated by enrollment growth in Northeast Baltimore. Students will remain on site during construction. Construction started in July 2020 with the new building (the first of two phases) scheduled to be complete in December 2021.

Rendering courtesy of SEI Architects; Northwood Elementary School

Montebello Elementary/Middle School (PK-8) – This 93,876 sq. ft. renovation with addition project, necessitated by enrollment considerations in Northeast Baltimore, is in GMP negotiation. Students are currently in temporary swing space at the Professional Development Center Building. The project will start construction in February 2021 is scheduled to open for students in summer of 2022.

Rendering courtesy of Crabtree, Rohrbaugh & Associates; Montebello Elementary/Middle School

Highlandtown #237 Elementary/Middle School (PK-8) – This project was initially an addition only project necessitated by enrollment growth in Southeast Baltimore but was expanded in December 2020 to include both a 48,266 sq. ft. building addition and a limited renovation of 74,492 sq. ft. of the existing building. The project is currently in the Design Phase. Design is anticipated to be complete in spring 2020. Students are located in temporary swing space at the Southeast Middle Building. The school will open for students in August 2022.

Rendering courtesy of JRS Architects; Highlandtown #237 Elementary/Middle School

SWING SPACE

During 2020, the program prepared three (3) Year 2 schools to relocate from their swing space into their newly completed permanent school buildings. Mary E Rodman was relocated during summer, and the two (2) others -- Medfield, and Walter P. Carter were relocated during the winter break.

The program also prepared two (2) Year 2 schools to relocate to swing spaces to facilitate renovation on their buildings. Highlandtown #237 was moved to the Southeast Middle Building, and Montebello into the Professional Development Center (PDC) Building, both during summer. Despite working under the disruption of COVID-19, the team demonstrated flexibility with its move logistics in terms of coordinating construction, furniture installation, and relocation within the original schedules.

The effort continues to require significant and logistics planning, project management focus, and the facilitation of transition services for each school. See **Exhibit 8** and refer to the Public Relation section for more detail.

21ST CENTURY ACADEMIC PLANNING

Baltimore City Public Schools has developed an academic planning process to support its schools with creating inspiring education environments. 21st Century Schools continues to collaborate with the broader school community to re-imagine the educational experience in the new environments.

The 21st Century Academic Planning Process involves working with the school-based instructional leadership team to address three key components of the plan. The first component is to identify an academic focus area based on shared educational values and the unique culture of the school community. Within the academic focus area, the leadership team considers how to address literacy and needs of the whole child and its families. Next, the leadership team revisits school structures to adjust processes and procedures to ensure a safe and supportive school environment. Third, the school considers current school traditions, how these traditions can be enhanced using the newly identified academic focus, and which traditions the school may want to add as it continues to grow in the new learning environment.

Nine months prior to the opening of a new 21st Century School, the academic planning process begins. Input and feedback are garnered from staff, students, parents, community members, and partners throughout this process through Instructional Leadership Meetings, School Family Council Meetings, Parent & Community Meetings, and Student Focus Groups. All stakeholders are involved throughout the planning and implementation process and have opportunities to lead this work within and across their stakeholder groups.

The academic focus areas that have been fully identified as of December 2020 are indicated in Table 3 below.

Table 3. Academic Focus Areas

School	Academic Focus Area
Frederick Elementary School Note: This school is a conversion charter school.	Direct Instruction, Core Knowledge, & Restorative Practices
Fort Worthington Elementary/Middle School	Project Based Learning & Restorative Practices
Wildwood Elementary/Middle School	STEM (Science, Technology, Engineering, and Mathematics)
Forest Park High School	STEAM (Science, Technology, Engineering, Arts, and Mathematics)
Pimlico Elementary/Middle School	Project-Based Learning
Independence High School Note: This is a charter school.	Experiential Learning
Dorothy I. Height Elementary School	Arts Integration & Restorative Practices
Arundel Elementary School	Restorative Practices & STEAM (Science, Technology, Engineering, Arts, and Mathematics)
Cherry Hill Elementary/Middle School	Restorative Practices & STEAM (Science, Technology, Engineering, Arts, and Mathematics)
Academy for College & Career Exploration Note: This school is part of the 100% project.	College & Career Exploration
Arlington Elementary School	STEAM (Science, Technology, Engineering, Arts, and Mathematics)
The REACH Partnership High School	Blended Learning
Bay-Brook Elementary/Middle School	Arts Integration
John Ruhrah Elementary/Middle School	STEAM (Science, Technology, Engineering, Arts, and Mathematics)
Calvin M. Rodwell Elementary/Middle School	STEM (Science, Technology, Engineering, and Mathematics)
Mary E Rodman Elementary School Note: This school is part of the 100% project.	Blended Learning
Medfield Heights Elementary School	STEAM (Science, Technology, Engineering, Arts, and Mathematics)
Walter P Carter Elementary/Middle School	STEAM (Science, Technology, Engineering, Arts, and Mathematics)

Professional Learning opportunities are provided for 21st Century Schools to enhance the implementation of their academic focus and to support the utilization of instructional technology to teach the 21st century skills of collaboration, communication, critical thinking, and creativity. Professional learning opportunities for this year included the following:

- Job-embedded learning opportunities led by arts educators to support arts integration at Bay-Brook in the spring of 2020.
- Achievement Unit courses focused on instructional technology best practices offered in the spring, summer, and fall of 2020 for instructional staff in 21st Century Schools. These courses focused on digital portfolios and projects, differentiating instruction with technology, blended learning, learner profiles, and creating spaces for 21st Century learning.
- The 21st Century EdTech Institute was held in August 2020 for instructional staff from the five 21st Century Schools opening in the 2020-21 school year, as well as the 21st Century Schools that have

opened in prior years. The Institute was held online August 17th through August 20th and it allowed participants to choose sessions around instructional technology practices that supported the implementation of the 21st century skills of communication, collaboration, critical thinking, and creativity in their classrooms.

- Guided opportunities and specific professional learning sessions around STEAM (Science Technology Engineering Arts and Math) instruction were provided for Medfield Elementary, and Walter P. Carter Elementary/Middle School in the summer of 2020.
- 3D printer training was provided to two representatives from each of the schools opening this year. At the end of the training each school received two 3D printers as well as filament to support printing student projects.

Ten-Year Enrollment Projections

A major component of the 21st Century School Buildings Program is to help the District reach the target utilization rate for the District. While design capacities incorporate multiple layers of data, a large part of the determination of future capacities is enrollment projections.

Consistent with previous years, City Schools employed a grade progression ratio (GPR) methodology to develop enrollment projections. GPR (also known as "cohort survival") is a standard measure in demographic analysis and is used by school districts nationwide. For grades 1 to 8, a 12-year rolling average GPR was used; for grades 9 to 12, a six-year rolling average was used. We believe this not only helps capture recent trends in student mobility but helps smooth the variations within the projected calculations. Projected enrollment for Kindergarten differs since there are no prior years that can be built on to develop a GPR (Pre-Kindergarten has limited seating and is therefore not an accurate measure of the number of children who will matriculate on to Kindergarten).

Projected enrollment for Kindergarten is calculated using three factors:

- 1) a projection of the Baltimore City population
- 2) a projection of the Birth Rate (per 1,000 people)
- 3) a projection of the "capture rate," the ratio of kindergarten enrollments to city births

To establish a floor around recent decreasing birth counts, our calculations utilize projected birth counts that are calculated by utilizing a five-year rolling average of historical birth rates with the city population projections. Projected captures rates are based on a five-year rolling average as well.

PK enrollments at the program level are dictated by the number of dedicated PK classrooms at the school. Therefore, PK enrollment projections are based on the planned number of classrooms and the historic utilization of the PK classroom space.

Projections for individual schools are adjusted so that the sum of all schools, by grade, matches the District-level projections discussed above. Projections for each grade are aggregated to produce a District total, and then used to calculate the proportion of this aggregated total that a particular grade at a particular school represents.

The final projections model was adjusted to account for several sets of special circumstances including schools adding grades, recruitment efforts, time spent in swing space, schools planned to close, and planned reconfigurations under the 21st Century School Buildings Program.

It is important to note that enrollment projections are coupled with other data points to inform facility capacity decisions. Over the past few years, City Schools has discussed and the IAC/MDP has

acknowledged that 10-year enrollment projections of students in City Schools should be reviewed with other relevant data.

As City Schools has previously experienced a three-year enrollment decline between SY 2015-16 and SY2018-19, the District 10-year enrollment projections reflect that downward District trend across all schools. Beyond the third year of enrollment projections, subsequent years are essentially projections based on the three-year enrollment trend, assuming and projecting ongoing school-level declines due to past District declines.

As such, enrollment projections and projected utilizations should be used as an estimation, but the circumstances at individual schools, as well as other neighborhood information and program data, all available throughout the CEFMP, should be considered when reviewing enrollment projections. This information includes population, demographic, and housing market information available in Chapter 2 and Appendix D of the CEFMP.

Baltimore City Public Schools produces ten-year enrollment projections annually using the current (September 30th) enrollment. SY 2019-20 (September 30, 2019) enrollment was used to generate projections for SY 2020-21 through SY 2029-30.

Based on the MOU, City Schools committed to a final district-wide utilization rate (without swing space) of 86 percent in SY 2019-20. The district exceeded the 86 percent target utilization rate in SY 2019-20, with a District-wide utilization of 87 percent.

The official enrollment for SY 2020-21 is 77,856, a decrease of 2 percent from SY 2019-20. Schools across the state and nation have seen steep declines in early learning enrollment tied to the pandemic/online learning. We anticipate a rebound in early learning enrollment once in-person learning returns. The anticipated SY 2021-22 utilization based on official enrollment for September 30, 2021 is 86 percent*. The anticipated utilization at the end of the 21st Century Program in SY 2024-25 per current Board approved decisions is 82 percent*.

Surplus Buildings

On November 10, 2020, City Schools presented the SY2021 Annual Review recommendations to the School Board of Commissioners. The final vote to approve the surplus of the following buildings will occur in January 2021.

Buildings proposed for surplus June 2021:

- Harriet Tubman Building (currently swing)
- William C. March Building (currently swing)
- Alexander Hamilton Elementary
- Guilford Elementary/Middle
- Sharp-Leadenhall Elementary
- Lois T. Murray Elementary/Middle
- Lockerman Bundy Elementary
- Buildings proposed for surplus June 2022
- West Baltimore Building (currently swing)

Through the Annual Review Process City Schools will continue to pursue opportunities to efficiently utilize facilities. This may include, but is not limited to closing, reconfiguring, and/or consolidating programs.

An additional change presented during the November 10th Board meeting included the extension of the surplus date to 2025 for the Northwestern Building. This change will support the longer time frame that Cross Country needs the facility for swing, and also to accommodate any swing needs arising from the High School Plan under the Built to Learn Act. The list of surplus school facilities can be found in Exhibit 6.

Annual Review of Schools Recommendations and 21st Century School Buildings Program (Formerly Ten-Year Plan) Amendments

City Schools reviews and modifies the plan yearly to reflect any necessary updates as part of its annual portfolio review process now called Annual Review of Schools (Annual Review). These changes and any updates to the 21st Century Schools Buildings Program are then reflected in the CEFMP. The Annual Review includes recommendations beyond amendments to the 21st Century School Buildings Program to include any major changes to schools including relocation, grade configuration changes, combining school communities and/or closure. In 2020, the following factors are considered when reviewing the District's school programs and facilities:

- Academic performance
- Climate indicators
- Access, quality, and distribution of school programming and assessing whether specific student populations and specific geographic areas are equitably served
- · School enrollment and school size
- Building utilization and condition
- Schools scheduled for actions per the 21st Century School Buildings Program

Additionally, the District has worked to make sure that these factors are viewed through an equity lens to understand how each of these show up and impact different communities, and to ensure as a District we are increasing access and improving educational programs, particularly in communities that have been underserved. Also, vital to this process is a shift from bringing in community input in reaction to recommendations, to incorporating school community feedback earlier in the process, where possible, to inform recommendations before presenting to the Baltimore City Board of School Commissioners (BOSC). These recommendations are complex and multifaceted affecting families across school communities and much of the work is in reimagining and deepening academic programming in school communities. The table below shows the Annual Review Recommendations and any proposed amendments to the 21st Century School Buildings Program. These were shared at the November 10, 2020 meeting of the BOSC and were approved at the January 12, 2021 BOSC meeting.

Table 4. 21st Century School Buildings Program Amendments

Recommendation	School / Building	Program Recommendation	Building Recommendation
Closures and Building Surplus	Alexander Hamilton Elementary School	Close effective Summer 2021	Surplus in Summer 2021
	Guilford Elementary/Middle School	Close effective Summer 2021	Surplus in Summer 2021
	Lockerman Bundy Elementary School	Close effective Summer 2021	Surplus in Summer 2021
School Relocation and Building Surplus	Lois T. Murray Elementary/Middle School	Relocate program to new 21st Century Walter P. Carter building	Surplus in Summer 2021
School Relocation, Grade Reconfiguration, and Building Surplus	Sharp-Leadenhall Elementary School	Expand grade band from 1 to 5 to 1 to 8 and relocate program to new section of 21st Century Harford Heights building	Surplus in Summer 2021
Building Surplus	Harriet Tubman building	n/a	Surplus in Summer 2021
	West Baltimore building	n/a	Surplus in Summer 2022
	William C. March building	n/a	Surplus in Summer 2021
21st Century Building Plan Amendments	Northwestern building	n/a	Change surplus date from 2021 to 2025

District-wide Utilization Plan

As a requirement of the 21st Century School Buildings Program's MOU, City Schools worked jointly with the IAC to develop intermediate and final utilization rate targets. The targets allow the District and MOU partners to track the District's progress toward achieving its utilization goal through new construction and subsequent building closures and surplusing. As the District reduces its building footprint to better reflect current enrollment, the overall utilization rate will increase.

The utilization targets, without swing space, presented below were established and approved by the School Board on December 17, 2013, through a resolution and approved by the IAC on February 20, 2014. Utilization targets with swing space were established and approved by the School Board on January 12, 2016.

- The intermediate District-wide utilization rate target, without swing space, was set at 80 percent for school year 2015-2016. City Schools exceeded this target with a utilization rate of 83 percent in that year.
- The final District-wide utilization rate was set at 86 percent for SY 2019-20, and due to significant changes in student enrollment and changes in the program schedule, identifying substantial completion in 2021, the District is not currently on pace to meet this target.

Regarding the impact of enrollment changes on meeting District utilization targets, it is important to note that in SY 2013-14, the first year the Utilization Report was produced, the projected utilizations indicated the District would meet these targets. As an example, the July 2014 CEFMP utilization projection (without swing space) for SY 2020-21 was 87 percent and for the July 2018 CEFMP that same year is 79 percent. Recent enrollment trends impacting District utilization are driven by a number of external factors such as parents' preferences for various academic settings as well as births. The number of births in Baltimore City has decreased approximately 11 percent from 2009 to 2015. While residential mobility is a potential factor impacting enrollment trends, based on the Non-Public School Report published by MSDE, the number of students living in Baltimore City and not attending City Schools in 2017 was 12,939, relatively the same as the five-year average of 12,547.

District-wide utilization challenges are also largely driven by specific building types and several large buildings in the portfolio. Elementary/PK-8 buildings are overall 99 percent utilized. Excess seats in underutilized buildings are concentrated in middle/high and high school buildings. In fact, most of our excess seats are in buildings that will be:

- 1) addressed by 21st Century School Buildings Program or will be surplused (Lake Clifton, Forest Park, Patterson High School)
- 2) buildings with CTE or arts performance spaces that also count as instructional spaces included in the buildings' State Rated Capacity (SRC) (Edmondson/Westside Skill Center, Dunbar High School, Carver Vocational-Technical High School, Merganthaler Vocational-Technical High School, Baltimore School for the Arts)
- 3) buildings that are housing charters with enrollment caps (Lemmel Building), or
- 4) large buildings where a portion of the building is being used for other purposes (Professional Development Building).

Nearly 60 percent of the excess seats in middle/high and high school buildings are in the 10 buildings mentioned above. City Schools will continue to review its District footprint every year as part of the Annual Portfolio Review. Proposed changes by the Interagency Commission on how CTE and performance spaces are calculated in the SRC methodology.

In addition to the projected utilization rates, the program schedule currently identifies overall substantial completion in 2022. With regard to the program schedule, initially using a range of 23 to 28 schools for completion, acknowledged a measure of uncertainty earlier in the program with respect to the bond market and the dollars that would be needed to complete the renovation and/or replacement of each school as identified in its feasibility study. Certain feasibility studies were delayed, allowing other more critical schools that were necessary to relieve overcrowding and/or accommodate combined schools resulting from portfolio actions to rise in priority. As a result of these factors, the District will request the partners to revisit the utilization targets and revise the School Board resolution.

In review of Exhibit 1 – Summary of Tables, the square footage per student for Year 1 schools is high with some low utilizations due to programs moved into swing spaces. All Year 1 schools, with the exception of Patterson and Arundel, had programs in swing space. When students move to swing space buildings, the buildings tend to be in adjacent neighborhoods or different parts of the city, causing the program to lose enrollment. Therefore, the drop in the enrollment may not reflect the District trend but does reflect the impact of the school program temporarily moving out of the neighborhood.

In review of Year 1 schools, the change in enrollment after school programs move to swing space buildings vary from a 9 percent increase to a 37 percent decrease in enrollment, with the average change of 9 percent decrease in enrollment. Drastic drops in enrollment due to program movement to swing buildings occurred for Forest Park High School and Dorothy I. Height Elementary at 37 percent and 27 percent declines respectively. However, once school programs return to home facilities, the enrollments have increased significantly, such as Fort Worthington Elementary Middle with a utilization of over 100 percent.

PROGRAM MANAGEMENT

The administration and management of this multi-faceted and multidisciplinary program requires that MSA and City Schools continue to work as seamlessly as possible to execute and manage the rigor required for each school project in the 21st Century School Buildings Program. This section provides more detail on how program staffing and procedures, project control software, program audit and oversight as well as the project management, committees and partnerships were implemented during 2020. Important associated program initiatives and collaborations, such as workforce development and minority participation, community engagement efforts, school-based teams, and co-location and facility use collaborations are discussed.

Program Staffing Update and Program Procedures

The MOU clearly defines the roles and responsibilities for high-level programmatic and school project coordination and execution for MSA, City Schools, the City, and the IAC. MSA and City Schools decided in the fall of 2016 that it would be beneficial to the program to have MSA procure and manage all projects under this program. It will be more efficient utilizing all the policies and procedures of one agency. It also allows for both MSA and City Schools to focus on their core strength areas of expertise. Although MSA is the primary party responsible for financial, procurement, contract, and administration of the program, City Schools' 21st Century School Buildings Program office shares responsibility with MSA, in accordance with the MOU on practically every other aspect of delivering the work. The combined program management staffs of MSA and City Schools includes comprehensive administration and procurement management, architecture and interior design expertise, construction and engineering project management, logistics management, education planners, communications, graphics and information technology support, community engagement, public relations, and workforce development management.

City Schools manages all school, community, partnership, and public engagement efforts for each replacement and renovation school project, and swing space sub-projects. City Schools also manages the associated regulatory and communication processes for all schools designated to be closed.

Project Control Software

Meridian Systems supplied Proliance on Demand at the beginning of the program for MSA in order to facilitate communication, reporting, and project status tracking among the multiple entities involved in the program. Proliance software is used to streamline business processes and collaboration, standardize data entry and to provide real-time data through reporting its capabilities for the entire program.

Program Audit and Oversight

MSA employs an internal auditor whose primary function is to review policies, procedures, and compliance on this program. MSA also employs a compliance officer who reviews and approves transactions in high-risk areas of the program.

The School Board approved the engagement of an external audit firm, CohnReznick, to conduct an Internal Risk Assessment and proactive analysis of the processes and procedures of the 21st Century School Buildings Program as it relates to City Schools' roles and responsibilities. In March 2018, after an extensive review, the external audit firm determined that City Schools' risk is minimal due to the transference of all construction activities to the MSA in 2016 and therefore an in-depth audit was not necessary.

PROCUREMENT

As of December 31, 2020, there have been more than 250 procurements and task orders totaling \$1,063,350,933 in contract awards. These awards include, without limitation, contracts for the following services: Program Manager Services, LEED/Green Building Consulting Services, Code Consultants, Risk Management Consulting, OCIP Insurance Brokerage and Administration, A/E planning/design, CM preconstruction/construction services, building commissioning, and testing and inspection services.

MBE Participation

Maximizing MBE participation and inclusion is a goal of the 21st Century School Buildings Program. Each contract is evaluated to determine appropriate MBE goals depending on many factors, including type of service, scope, market availability, and schedule. As of December 31, 2020, total MBE participation is 33.11 percent or \$350,042,030.²

Compliance Systems

MSA uses two systems to monitor compliance with MBE and prevailing wage requirements. MBE awards and payments are verified electronically using B2GNow©, allowing for up-to-date information regarding MBE participation commitment and actual achievement. Further, LCPtracker© is used to monitor compliance with the prevailing wage requirements as well as residency verification for local hiring requirements. GIS capability was added to the system in September 2019.

Owner Controlled Insurance Program (OCIP)

Starting in 2016, MSA implemented an Owner Controlled Insurance Program (OCIP). The OCIP consists of worker's compensation, general liability and excess liability coverages for the construction managers and their subcontractors during the construction phase. MSA also bound builder's risk and contractor's pollution liability to compliment the OCIP coverages. Since the program's inception, 17 projects and 1,132 contractors have been enrolled.

² Reference Exhibit 7a for Procurements and 7b for MBE Participation

COMMITTEES and PARTNERSHIPS

Executive Committee

Pursuant to the MOU for the Construction and Revitalization of Baltimore City Public Schools, Section IID establishes the Executive Committee, its duties, and responsibilities. The Executive Committee meets quarterly for the purpose of overseeing, reviewing, and monitoring the performance of the parties as described in the MOU. The Chairmanship of the Executive Committee rotates annually between the parties. The 2018 sessions were chaired by MSA. The 2019 sessions were chaired by the IAC. The 2020 sessions were chaired by City Schools. The 2021 sessions will be chaired by Baltimore City.

The Committee is comprised of participants from the IAC, MSA, City Schools, and the City. During each session, the following reports are presented to the Committee for general discussion and approval as necessary:

- Coordinating Committee
- Collaborative Group
- STAT Committee
- IAC Report
- · Financial Report
- MSA Report
- City Schools Report

Typical reports to the Committee include status updates on the program including schedule, project, and budget updates. The Committee is charged with reviewing and approving items presented during these sessions. The 2020 meeting minutes are available for review on the Executive Committee page of the 21st Century School Building Program website³.

Coordinating Committee

The Coordinating Committee – comprising representatives of the City (Mayor's Office), City Schools, MSA, IAC, Baltimore City Department of Planning (DOP), Baltimore City Department of Recreation and Parks (BCRP), and Baltimore City Department of Housing and Community Development (HCD) – works to maximize investments around the 21st Century School Buildings Program projects and community revitalization efforts. The Coordinating Committee is required to meet at least quarterly, in a public meeting, to coordinate and plan for:

- The timing, location, and scope of school facility investments.
- Community development efforts to support the City's revitalization and stabilization goals.
- Citywide or specific school-level education requirements and design standards that impact community development (such as access, recreational uses and sustainability).
- Community and stakeholder involvement in construction projects relevant to community development.

³ http://baltimore21stcenturyschools.org/committees/executive-committee

- The identification and use of vacant school buildings consistent with City Schools' annual
 portfolio review and the potential reuse of surplus or vacated school buildings and
 facilities by the City.
- Input on each Feasibility Study for all projects during each study's preparation phase, and the opportunity for review and comment before each Feasibility Study is finalized.
- Proposed changes and amendments to the 21st Century School Buildings Program.
- Development of funding strategies to implement improvements that are otherwise not eligible for financing under the bond proceeds or cash on hand.

STAT Committee

MSA chairs the Stat Committee, which is represented by each agency party to the MOU. This Committee meets at least quarterly and reports on key areas of the program such as budget, payments, change orders, MBE, and schedules.

Collaborative Committee

The goals and charges of the Program go beyond just the design and construction of 21st Century Schools to also include collaboration with the broader community. This includes work force development and minority business enterprises. Pursuant to the MOU for the Construction and Revitalization of Baltimore City Public Schools, Sections II-B and II-C were adopted regarding workforce development and minority business participation as denoted below:

- Workforce Development Section II-B: The City, the School Board, and the Authority
 agreed to establish and participate in a collaborative group (the "Collaborative") to work
 together to maximize the opportunities for the City Schools' students and City residents
 to be informed about, prepared for and connected to work-based learning and
 employment opportunities created by the Program.
- Minority Business Enterprises Section II-C: The Collaborative and the Mayor's Office of Minority and Women-Owned Business Development (MWBD) will work to maximize the utilization of State-certified, locally based, minority- and women-owned businesses.

Minority Business Enterprise

One important goal of the Program is to contribute to the pipeline of qualified, small, local, minority- and woman-owned contractors with the capacity to participate as prime contractors and subcontractors. With this goal in mind and pursuant to the terms of the MOU, the Collaborative and MWBD developed an outreach and inclusion plan ("MBE Plan") ⁴ to be administered by MSA in partnership with MWBD for all funded projects. Further, the Collaborative Committee also created a Supplier Diversity subgroup, chaired by MWBD, which created a supplier diversity plan.

An important component to ensure inclusion of minority and women-owned firms in the Program is to review all contract opportunities to determine the appropriate MBE participation goal and sub-goals based on the specific circumstances of the project. The Program has been very successful in achieving MBE participation, both at the prime and subcontractor levels. **Exhibit 7b**

⁴ The plan is attached as **Exhibit 7b**.

reflects a summary of all Program awards and the level of MBE participation. As set forth therein, as of December 31, 2020, the Program achieved 33.1 percent in MBE participation.

The MBE Plan also envisions providing educational assistance to local, small, minority- and women-owned firms on methods of doing business on Program-related projects. Since the Program's inception, MSA has participated in over 62 state-wide business outreach events, 14 of which were organized by MSA to discuss specific potential outreach opportunities in the Program and provide technical assistance. MSA will continue to promote the objectives of the MBE Plan and to implement strategies to ensure that these objectives are met.

WORKFORCE DEVELOPMENT

Local Hiring

In accordance with the MOU, The Mayor's Office of Employment Development (MOED) was charged with developing a comprehensive local hiring plan to support the goals of the Collaborative Committee. This plan leverages the resources of MOED's One Stop Career Center Network and works collaboratively with a broad range of City educational, workforce/training, faith-based and community organizations to assist in the training and preparation of City residents for employment opportunities created by the 21st Century School Buildings Program.

Currently, 17 school buildings housing 19 schools have been completed. Five additional schools have fulfilled their workforce development requirements since our last report. The schools are Arlington Elementary School, Bay-Brook Elementary/Middle School, Calvin M. Rodwell Elementary/Middle School, the Lake Clifton Park Building, and John Ruhrah Elementary/Middle School. The combined local hiring commitment for these schools was 112 Baltimore City residents. The Construction Managers exceeded their individual commitments and hired a total of 237 people. Our office is awaiting final paperwork from Mary E. Rodman Elementary School which opened in Summer 2019.

At the time of award, the Construction Managers for each project commit to hire Baltimore City residents as a condition of their contract. Job retention for local residents is a priority for the Program and we are pleased that local residents have found long term employment as an outcome of the Program. A more in-depth calculation and analysis of payroll records will show how many residents worked multiple positions over the course of these projects.

Table 5. 2020 Workforce Development Efforts by Project – Hired Local Residents

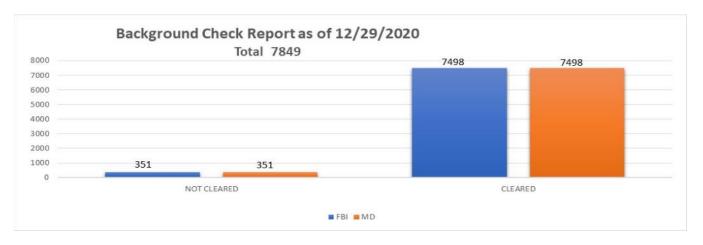

School	Hours (BCR*)	Hires(BCR*)	Hours (Total)
Co	ommitment		
Arlington Elementary/Middle School	27,111	26	172,844
Arundel Elementary/Middle	43,100	38	135,849
Bay Brook Elementary/Middle School	10,310	9	133,910
Calvin M. Rodwell Elementary/Middle School	51,782	23	158,125

Robert Poole Building	57,574	95	281,920
Wildwood Elementary/Middle (Lyndhurst)	40,050	66	240,870
TOTAL All decimal points dropped *BCR = Baltimore City Resident	631,235	948	3,264,509

*BCR – Baltimore City Resident

Calendar year 2020 closes with commitments for hiring Baltimore City residents from all schools currently under construction. Please reference **Exhibit 7c** for detailed breakdown.

Local Hiring Background Investigation Processing

As of December 29, 2020, City Schools' Human Capital Pre-Enrollment Office has processed approximately 7,849 applications for individuals to work on the 21st Century School Buildings Program projects. Of these, 351 individuals were not cleared.

Due to COVID-19, the Pre-Enrollment office was closed between March 16th to July 3rd. During this time 547 paper applications were accepted for workers through a "temporary work-around process," which allowed for critical hires to begin working without a background check while the office was closed. The office reopened on July 6th rendering services by appointment only, which is scheduled through a customized web-based platform, AppointmentPlus. Since the office reopened, 745 background checks have been completed, including those workers in the "temporary work-around process."

Since creating an "Appeals" process in November 2019 to reduce barriers to employment by allowing applicants who do not pass City Schools background employment to appeal the decision, three of five applicants were able to obtain reversals allowing them to be cleared for work. The applicants utilized the process to explain their circumstances, submit proof of a successful intervention program, and provide a work character letter from their prospective employer. We consider this process a success, and will continue to provide solutions like this, as a partner in the Collaboration Working Group led by the Mayor's Office on Workforce Development, to increase City Resident participation, one person at a time.

Work-Based Learning Program

Since beginning the partnership with Urban Alliance, a Baltimore-based non-profit organization in 2016, 20 students have been paired with 21st Century design and construction firms during their senior year of high school at 21st Century School Buildings Program job sites for internship. The program concluded August 1, 2019 and was scheduled to reconvene March 2020. The internship was delayed due to the COVID-19 pandemic, so no training was held.

However, 21st Century has worked with Urban Alliance to create a "Transition to Worksites Plan" to benefit students and mentors. The hybrid training model is coined "Operating in a Post-COVID-19 Workplace." This new, paid, remote internship plan includes building skills in digital literacy, participating in a national speaker series, and accessing online mentoring. This will be held until such time the impact of COVID-19 has been mitigated.

PUBLIC RELATIONS

Community Engagement

The year 2020 has been a challenging year due to the COVID-19 pandemic. The engagement team quickly pivoted its community engagement to a fully virtual model. Prioritizing the safety and security of all our partners and staff, the program elected to use GoToWebinar as its virtual platform, to continue engagement activities and support school construction. The team spent many virtual hours engaging with communities, and school partners in preparation for closures, mergers, feasibility studies, and construction updates. In 2020, the team was able to hold five in-person community meetings before pivoting to GoToWebinar. Since that pivot, the engagement team held 48 virtual community meetings with over 900 attendees. Students, parents, school faculty, and staff were all active participants in providing feedback for each school project. For the safety of all, meetings are continuing to occur virtually in 2021.

In 2020, the engagement team hosted several Feasibility Study meetings. Early in the year, the Plan Year 3 school meetings, which includes the high school programs, were kicked off. These meetings included the historic Baltimore City College High School and the historic Frederick Douglass High School, which is proposed to be co-located with the Joseph C. Briscoe Academy. Meetings were also kicked off in November for Commodore John Rodgers Elementary/Middle School.

In July of 2020, in preparation for the start of construction and to introduce teams, community construction meetings began for Northwood Elementary School. Meetings are held in both English and Spanish to meet the needs of the community. The final construction meetings were held for Medfield Heights Elementary, Walter P. Carter Elementary/Middle, and the Lois T. Murray Elementary/Middle because those schools received Occupancy Certificates in December 2020. Due to COVID-19, the grand opening and ribbon cutting ceremony was delayed to late-January 2021. Although Lois T. Murray Elementary/Middle School is completed, the students will not be relocated until June 2021 due to the disruption that a mid-year move would have on the students.

As the program continues to prepare for students to return to school, the engagement team continues to work virtually with merging schools — Calverton Elementary/Middle School, James Mosher Elementary School, and Alexander Hamilton Elementary School, to engage students, families, principals, and teachers. Our student ambassador programs, "Love Our Schools" and "Acts of Kindness" were placed on hold due to COVID-19 because of the amount of in-person coordination, however, in continuing to build solidarity amongst students, identical book bags were acquired for the merging schools, and a partnership was fostered with the Zeta Phi Beta Sorority Inc, Mu Xi Zeta Chapter to obtain 20 Amazon Fire Tablets for student raffle opportunities. Dishiya Joy from Mary E. Rodman Elementary was one of the winners.

Dishiya Joy, 3rd Grade student at Mary E. Rodman & Raffle Winner

Some limited in-person activities were permitted to facilitate the progress of certain initiatives. In August of 2020, a site visit was held with elected officials who represent the Highlandtown Elementary/Middle School #237 district. The meeting discussed the proposed new addition addressing the overcrowding needs at the school, as well as the use of the limited green field area in accommodating the rear addition, while allowing for recreation activities for the community. The walk was attended by Delegate Robbyn Lewis, Councilwoman Danielle McCray, Delegate Luke Clippinger's office, Senator Bill Ferguson's office, the MSA, and JRS Architects.

Program and elected officials gather at Highlandtown Elementary/Middle School #237

Another in-person activity that was scheduled as part of the continuous learning process, was the MOU Partner's Retreat held October 21 and 22, 2020. The partners with some Inter-Agency representatives participated in a site tour of Fort Worthington Elementary/Middle, and the REACH! Partnership school in the restored Lake Clifton Park Building to assess how they aligned with the original goals of the Program after occupancy. The attendees received comments from the school leadership, and reviewed challenges, opportunities, and lessons learned since the Program's inception. The feedback is being used as a catalyst to initiate design changes in future buildouts.

MOU Retreat: Day One, Tour of Fort Worthington Elementary/Middle School

INSPIRE

INSPIRE (Investing in Neighborhoods and Schools to Promote Improvement, Revitalization, and Excellence) is the City's effort to bolster the extraordinary investment into the school system. It leverages the 21st Century program to support children's learning and to improve neighborhood conditions and increase the tax base. The INSPIRE plans are facilitated by the Department of Planning (DOP) and created and implemented through many City agencies and community partners. This is a snapshot from 2020.

Plans Adopted and Underway

Eleven INSPIRE plans have been adopted by the Baltimore City Planning Commission. Throughout 2020 seven planning processes were underway: John Ruhrah, REACH! Partnership at Lake Clifton Park Building, Harford Heights, Govans, Mary E. Rodman, Robert W. Coleman, and Medfield Heights. All plans can be found on the INSPIRE web site.

By the Numbers: Improving Streetscapes

Streetscape improvements along primary walking routes are one of the most immediate investments around 21st Century schools. In addition to beautifying the neighborhood, these improvements help ensure safer pedestrian access to the schools for students and others. To date, Baltimore City Department of Transportation has fixed deficient sidewalks along approximately 34 miles and the Department of Recreation and Parks' Tree Baltimore program has planted over 1,350 street trees.

Partnerships Build A Playground in Southwest Baltimore

In December, Baltimore City Recreation and Parks (BCRP) and KaBOOM!, with additional funding from the Baltimore City Children and Youth Fund and INSPIRE, built a new playground at the Mary E. Rodman Recreation Center. The playground was designed, in part, by students from Mary E. Rodman Elementary School, Allendale community members, and other school stakeholders. BCRP is now in design for additional site improvements including a new plaza, ADA accessible circulation, and further expansion of the playground. Until now there hadn't been many places for children to play in the Allendale community. Throughout the Mary E. Rodman INSPIRE planning process, the DOP heard how important a playground was to the Allendale Community Association members and other residents. The playground is one of many examples of multiple City agencies leveraging their resources with external partners to respond to residents' desires surrounding 21st Century schools.

Photo Credit: Baltimore City Recreation and Parks

Art Connects Students with Nature in Park Heights

The Pimlico Elementary/Middle School INSPIRE plan identified improving the connection between the school and three important recreational, natural, and educational assets: the Cylburn Arboretum, Jones Falls Trail to the east, and C.C. Jackson Recreation Center to the west. Despite being located just one-half mile from any of these Baltimore gems, there was no physical or social connection from the school. Through funding from the Pimlico Community Development Authority, artists Whitney Frazier and Graham Coriel-Allen along with DOP, BCRP, Cylburn Friends, and Cylburn Combined Communities designed wayfinding public art to connect these resources. Installation of <u>Baltimore Checkerspot Butterfly</u> signs and stencils of flowers along Oakley Avenue was substantially complete at the end of 2020.

Photo Credit: Graham Coreil-Allen

Mosaic Learning Platform Enhances Fort Worthington Elementary/Middle School Garden

Break and Make Mosaics (artists Herb Massie and Dominique Hellgeth) worked with students and teachers at Fort Worthington E/MS to design a mosaic structure that celebrates the Fort Worthington neighborhood and the new Fort Worthington Community Garden. The beautiful structure — which features mosaics of the school, houses in the area, and students' hands — was installed in early 2020. Parks & People designed and led a team of contractors to construct a new fence for the garden and will be installing a pathway, sprinkler system, and raised beds in early 2021. Throughout 2020 Brian Burns of United Community Network assisted then-principal, Monique Debi and science teacher, Mrs. Patterson, in maintaining the garden while classes were not in session at the school.

PROGRAM COMMUNICATIONS

The communications team continues to provide writing, graphic design, and coordination support for a wide range of activities, such as photo collection and archiving, time capsules, internal and external meetings, swing school location changes, and other special events.

Communications Vehicles and Methods: By the Numbers (as of December 8, 2020)

Facebook - Number of page likes in 2020 compared to 2019.

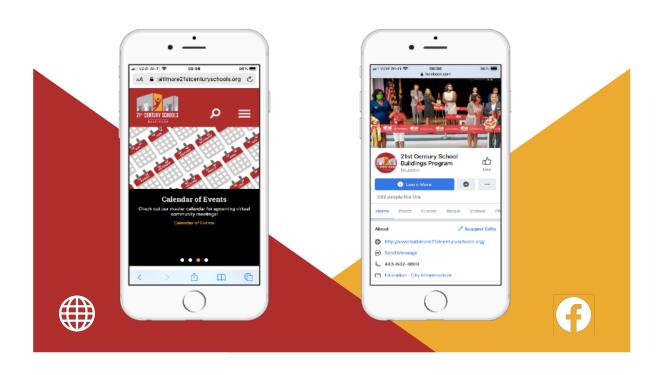

- 12/17/2019 507 Page Likes
- 12/08/2020 588 Page Likes (16% increase)

Facebook - Trending posts, what type of posts had the most reach and/or engagement.

Top Performing Posts of 2020:

Special Events: Public Forum and Ribbon Cutting

Public Forum at Forest Park High School

On February 6, a public forum was held at Forest Park High School (a 21st Century School that opened in 2018) to reflect on the Program's history and to look ahead at future school projects. Attendees enjoyed a free dinner provided by students in the Culinary Arts Career and Technology Education (CTE) program, an interactive timeline display of the program's history, student-led tours of the school, and an exhibit of materials from time capsules found during construction. Speakers included Forest Park High School Principal Monica Dailey, Baltimore City Mayor Bernard "Jack" Young, Maryland Stadium Authority Chairman Thomas Kelso, and City Schools CEO Sonja Santelises. The event provided an MOU-required opportunity for community members to share their opinions and feedback during a public comment section and in information sessions about design, academics, community engagement, future projects, and jobs and internships.

In response to the COVID-19 pandemic, the communications toolbox was enhanced to capture the shift to virtual engagement. The communications department has utilized consistent messaging when delivering robocalls and emails to notify stakeholders about meetings and construction site developments and when creating calendar entries on the 21st Century School Buildings Program website, with complementary Facebook event posts. Significant progress was also made to update and improve the technical infrastructure of the Program's website, which continues to serve as the central and most-often relied upon source of information for both the community and for Program partners. The communications team continued reviewing, revising, and managing multiple PowerPoint presentations for community meetings, while coordinating closely with the engagement team to schedule, plan, and promote community engagement meetings.

Also, in response to the ongoing pandemic, the team planned the Program's first "hybrid" grand opening celebration and ribbon-cutting event for the Mary E. Rodman Elementary School on Wednesday, August 26. Unlike previous school openings, this event was closed to the public. In accordance with Baltimore City's COVID-19 guidelines, the in-person audience was limited to twenty-five invited guests and safety protocols (e.g., screenings and social distancing) were followed to mitigate COVID-19 concerns. This event was also livestreamed via City Schools' social media channels and within 24 hours was watched more than 6,000 times.

Ribbon-cutting at the Mary E. Rodman Elementary School.

A combined, virtual grand opening for Medfield Heights Elementary School, and the co-located schools of Walter P. Carter Elementary/Middle School, and Lois T. Murray Elementary/Middle School is scheduled for Wednesday, January 27, 2021. This event will feature a pre-recorded video of all three school spaces and premiere via City Schools' social media channels.

PROGRAM FINANCIAL REPORT

Attached is the Statement of Revenues and Expenditures related to the activities for the Baltimore City Public Schools. Please reference **Exhibit 3** for detailed information.

Revenues

Revenues were higher by \$10.5 million than the budget. The primary reasons for this are related to the true-up of the 2019 bottle tax revenues, table game proceeds and facility rental of \$5.8 million and greater investment\interest income of \$4.3 million, related to the investment of the bond proceeds.

Expenditures

Overall, expenses through June 2020 were \$27.4 million under budget. Below are some of the major variances:

Contractual Services

This category was under budget by \$30.7 million. The budget for construction was very aggressive for the fiscal year.

Grants and Subsidies

This category was over budget by \$3.3 million. This category is to reimburse Baltimore City Public Schools for operating expenses and end-user devices. End-user device invoices for schools opened in prior years were processed for payment in FY 2020.

COMPREHENSIVE MAINTENANCE PLAN UPDATE

The State of Maryland's Interagency Commission on School Construction (IAC) and the Public School Construction Program (PSCP) require that each Local Education Agency (LEA) establish and annually update a Comprehensive Maintenance Plan (CMP). Our comprehensive plan must describe the Baltimore City Schools' Board of School Commissioner's (School Board) strategy for maintaining its public school facilities, and the plan must also be compatible with the School Board's Comprehensive Educational Facilities Master Plan (CEFMP) and Capital Improvement Plan (CIP). The PSCP analyzes each LEA's plan when capital project funding decisions are undertaken.

Additionally, per the Memorandum of Understanding (MOU) resulting from the passage of House Bill (HB) 860 by the State of Maryland in fiscal year (FY) 2013 for the Construction and Revitalization of Baltimore City Public Schools, City Schools must provide a plan for maintaining school buildings and demonstrate progress toward achievement to be measured through a set of 13 Computerized Maintenance Management System (CMMS) metrics approved by the IAC.

Most importantly, the purpose of the CMP is to provide a strategic overview of our facility maintenance program and highlight continuing improvements and new initiatives to increase efficiency and improve quality of services delivered. The CMP details City Schools' organizational structure, plans, and activities established to maintain State and Local Government investment in public school facilities. Representing the School Board, the department of Facilities, Maintenance, and Operations (FM&O) oversees these plans and programs, while the Facility Planning department administers the CEFMP, which includes the CIP.

The plan demonstrates how City Schools' FM&O department:

- 1. Meets the School Board's expectations and aspirations to fulfill the educational goals for Baltimore City school students;
- 2. Works to ensure regulatory compliance;
- 3. Continues to evolve with new technology and updated facility management industry standards; and
- 4. Reports and quantifies performance data for measurable outcomes.

The School Board, Chief Executive Officer (CEO), Chief Operating Officer (COO), and Deputy Chief Operating Officer, supported by FM&O, strive to provide a safe and healthy learning environment for students, faculty, and the community while operating our school buildings in an efficient manner. The district's maintenance and preventive maintenance (PM) programs are the foundation necessary to support the educational programs and sustain our facilities.

The relationship between facility maintenance and capital investments is clearly defined and there is an implied understanding that good maintenance of building systems and equipment will defer or reduce the need for capital investments. Also, well-timed and judicious use of capital investment should reduce the burden on maintenance staff, time, and resources while prolonging the life of the building. Both forms of investment are likely to result in better building performance, a reduced risk of building failure, and

savings in operations and utility expenditures. Most importantly, these combined investments will have positive effects on the health and well-being of building occupants.

Facility management professionals use 3 percent of facilities Current Replacement Value (CRV) as a guideline for the annual investment necessary to maintain school buildings in good condition. The FM&O FY2021 operating budget is \$34,143,335. The calculated recommended index value for City Schools would be \$151.9M annually (facility operating budget as a percentage of CRV). City Schools would need to increase the operating budget approximately \$117.8M to achieve this and to bring about a dramatic improvement to school facilities.

With limited resources, the operations department will have to explore more strategic methods to implement day-to-day repair and maintenance tasks, explore alternative funding mechanism such as performance contracting to support replacement of systems, identify supplemental resources and focus on a lean staffing model.

The continual creation of proposed and pending new state regulations and requirements places a heavy burden on the existing availability and usage of maintenance funding. New regulations ultimately lead to the improvement of school facility conditions; however, the current and near-future funding needed to sustain such improvement is not available to fulfill such obligations at this time. Moreover, mandates must be supported with state or local-level, supplemental dollars for complete compliance.

The CMP highlights specific information related to the department's budget, organizational components, staffing structure, and strategies over the next five years measured by performance indicators that were developed in agreement between the IAC and the School Board.

Computerized Maintenance Management System (CMMS) Implementation

Since Fall 2016, FM&O has been incrementally implementing more efficient maintenance practices, inclusive of a more robust and efficient PM program (see timeline). This will result in an extensive asset inventory in the CapitalForecast module within the SchoolDude software package, along with automated PM schedules within the PMDirect module for specific critical building assets. Input for existing buildings was completed in spring 2020 and 21st Century Buildings will be completed when the final building comes online.

Task	Target Start	Progress	Note
Arundel	Jan 2020	Complete	As school buildings are
Arlington	Jan 2020	Complete	preparing to come online,
Bay Brook	Jan 2020	Complete	target start dates may be
Calvin M. Rodwell	Jan 2020	Complete	delayed based on when City Schools receives 90% BMPs

Equipment and automated PM schedules for existing school buildings have been placed into SchoolDude and are now auto-generating as of July 2020. For all remaining buildings, including 21st Century buildings, PM work orders will continue to be entered into SchoolDude manually until all pertinent information has been received, reviewed, and uploaded.

Staffing Model

Departmental increases in FY2019 supported mechanical PM work and non-mechanical services, as well as supplemental trade support and additional staffing.

	5 year Plan: Facility and Maintenance FY2019 - FY2023							
	SY18-19	SY19-20	SY20-21	SY21-22	SY22-23			
21st Century Buildings								
Plan & CEFMP	FY2019	FY2020	FY2021	FY2022	FY2023			
Total Square Footage	18,114,098	17,868,926	16,973,372	16,878,381	16,428,988

SF to Maintain	17,868,926	16,973,372	16,878,381	16,428,988	16,551,667			
District School Buildings								
Total School Bldgs	156	153	150	145	139			
Closed School Bldgs	-3	-3	-5	-6	-1			
School Bldgs to Maintain	153	150	145	139	138			
Staffing Needs ⁵								
FTEs Needed	190	180	179	174	175			
Projected FTEs w/\$3M ⁶		129	141	153	165			
FTE Deficit		51	38	21	10			

In addition to reducing total square footage, the proposed budget increase should address staffing levels to better support facility needs and challenges, and more importantly, provide additional funding for PM to ensure our facilities stay online. Increased investment in staffing will ensure appropriate oversight and support to address facility deficiencies or minor challenges. Staffing increases will reduce reliance on contractors, that at times, lack historical knowledge of City Schools' facilities, and often present variation in support of facilities based on their own staffing limitations. It's anticipated that by FY2023 FM&O will have 94 percent of the FTEs required to maintain school buildings; however, if funded an additional \$1M in FY2024 FM&O can reach 100 percent capacity.

IAC CMP Review

City Schools, in accordance with the MOU, once again increased the annual budget for facilities maintenance and operations (FM&O) and continued to refine its organizational framework in order to deliver the best possible maintenance outcomes. Despite the unexpected and extensive demands associated with COVID-19, City Schools was able to complete more work orders, and more preventive maintenance (PM) work orders than in prior years. In addition, City Schools continued to implement its

⁵ Staffing needs are based on the APPA's Managed Care Service Level square footage of 94,430 sqft/FTE and only looks at the total number of trades personnel needed. It does not include management positions and does not consider mixture of building types, building ages or a building systems' sophistication.

⁶ Projected FTEs are based on being able to create 12 new positions a year and assumes FM&O does not experience a budget reduction during this period of time.

computerized maintenance management system (CMMS). As of summer 2020, equipment at all open 21st Century Schools facilities had been inventoried and the CMMS set up to auto-generate PM work orders — which is a critical need for maintenance effectiveness.

Further implementation should include:

- 1. the auto-generation of PM work orders for all City Schools facilities, and
- 2. the use of the CMMS to manage all work orders.

In 2020, state maintenance effectiveness assessments (MEAs) of both new City Schools facilities and older facilities indicated that work orders entered into the CMMS do not represent the full extent of the work needed to effectively maintain the portfolio of City Schools facilities. Whether the additional work orders are entered and remain open until completed or are entered and then deferred; the extent of the work needed cannot be fully met until the need is fully determined. Given that the FM&O budget is more than \$100 million less than the budget needed for effective maintenance of a portfolio of more than 16 million square feet across 150+ facilities, that more work is needed should come as no surprise. And that more work is needed should not discount the improvement in maintenance effectiveness that City Schools has achieved since the inception of the Program in general, and in recent years in particular.

Exhibit 7b: MBE Outreach Inclusion Plan and Commitments

City of Baltimore, Baltimore City Public Schools, and the Maryland Stadium Authority Collaborative Commitment to Supplier Diversity Outreach and Inclusion for Projects under the Act

Background

The Maryland General Assembly passed the Baltimore City Public Schools Construction and Revitalization Act of 2013 (the Act), authorizing the Maryland Stadium Authority (MSA) to fund up to \$1.1 billion in improvements to Baltimore City public school facilities, resulting in renovation and replacement projects expected to be completed by the end of 2020 (the Projects). Pursuant to the Act, the City of Baltimore (the City), the Baltimore City Board of School Commissioners (the School Board), the Interagency Committee on School Construction (IAC), and MSA entered into a four-party Memorandum of Understanding (MOU) outlining each party's roles and responsibilities. The MOU was approved by the Maryland Board of Public Works on October 16, 2013.

Purpose

The MOU established a collaborative group (the Collaborative), comprising the City, the School Board, and MSA, to work with the

Mayor's Office of Minority and Women-Owned Business Development (MWBD), on an outreach and inclusion plan to promote the utilization of State-certified locally based minority and women-owned businesses on the Projects, in compliance with State law. A subcommittee of the Collaborative, chaired by the MWBD, developed the attached Supplier Diversity Outreach and Inclusion Plan (the Plan) in furtherance of this purpose.

Process

The Supplier Diversity Sub-group, chaired by MWBD, has been formed to ensure that the Plan maximizes opportunities for Minority Business Enterprises (MBEs). The Sub-group will meet no less frequently than quarterly to assess the progress of the Plan. Information about the progress of the Plan will be shared regularly with community stakeholders and by using the Sub-group member organizations as primary communication channels.

Conclusion

While all procurements under the Act must comply with State MBE law, the Collaborative and MWBD have developed the Plan to facilitate the access of Local MBEs to business opportunities generated by the Projects. The Plan's objectives and strategies may be revised as the Projects progress, in an effort to continue to facilitate MBE outreach and inclusion, as well as to comply with State and federal law.

PLAN DETAILS

OBJECTIVES	STRATEGIES	WHO'S RESPONSIBL	ACHIEVEMENT TO DATE
Actively seek and conduct outreach to Local MBEs.	A. Market to and conduct MBE outreach events for contracting and subcontracting opportunities throughout the life of the Projects, including outreach events targeting businesses located primarily in Baltimore City and the counties contiguous to Baltimore City.	MSA City Schools	
	A.1 Implement a two-pronged approach to outreach for (1) Construction Manager (CM) packages, and (2) Trade Contractor Packages under each CM. Perform a minimum of two "awareness sessions" to inform contracting community of upcoming opportunities and how to prepare. Perform targeted outreaches to MBEs for each grouping of major trade bid packages released. Include meaningful prime firm/team interaction and MBE advocates in the outreaches.	MSA City Schools	
	A.2 Attend and provide presentations at MBE open house events, and outreach events to subcontractors and consultants, to raise awareness for Local MBEs.	MSA City Schools MWBD	
	B. Identify/highlight potential subcontracting /segmentable opportunities in solicitations where there are no Statecertified MBEs (gap analysis) in an effort to increase MBE subcontracting goals on future solicitations for the Projects.	MSA City Schools MWBD	
	C. Identify and market contracting opportunities to minority and women-owned businesses that are not State-certified MBEs in an effort to increase the pool of MBEs for the Projects. Encourage City-certified, CRMSDC-certified, and WBENC-certified minority and women-owned businesses to become State-certified MBEs for increased opportunities in the Projects.	MSA City Schools MWBD Supplier Diversity Sub-group	

OBJECTIVES	STRATEGIES	WHO'S RESPONSIBL	ACHIEVEMENT TO DATE
	D. Consider unbundling contracts with the objective of creating smaller, segmented contracts to be designated as Small Business Reserve (SBR)-only under the SBR Program. This will provide larger pools of MBEs with the opportunity to bid	MSA City Schools	TODATE
2. Provide educational assistance to Local MBEs on the	on the contracts. A. Request that MSA and City Schools be included in any outreach efforts conducted by MWBD and Advocacy Partners.	MWBD Supplier Diversity Sub-group	
methods of doing business on the Projects.	B. MWBD, MSA, City Schools, and the Governor's Office of Minority Affairs (GOMA) will work collaboratively to hold targeted outreaches for MBEs.	MWB D MSA	
		City Schools	
	C. Partner with local resource/support services agencies, associations, organizations, etc. to offer "Contractor Bootcamps," bonding workshops, and other relevant educational/preparatory opportunities to help strengthen the pool of qualified subcontractors available to work on the Projects.	MSA	

3. Encourage prime contractors to utilize Local MBE subcontractors for the commodity or service being bid.	A. MSA will hold roundtable discussions with prime contractors on the goals for MBE participation. Recommend establishing expectations up front and using RFP language to express to primes the expectations re: MBE participation commitments and consequences if they are not achieved (liquidated damages, etc.).	MSA	
	B. Tiered subcontracting. There should be a process in place allowing prime contractors to include tiered subcontracting in calculating MBE	MSA City Schools	
	participation.		

OBJECTIVES	STRATEGIES	WHO'S RESPONSIBLE	ACHIEVEMEN T TO DATE
Reporting. A reporting of transactions will be performed to monitor the success of efforts to increase participation of Local MBEs.	A. The STAT Committee will submit quarterly reports to the Executive Committee and MWBD, describing outreach efforts for the solicitations that have been advertised; all bid awards (including total and MBE awards); Local MBE contract awards; and all payments (including total and MBE payments).	MSA City Schools STAT Committee	
mbes.	B. As the Projects progress, the STAT Committee will disseminate information on rates and figures related to attaining or exceeding MBE participation goals, as well as rates and figures identifying Local MBE participation as a portion of the overall information.	MSA City Schools STAT Committee	
5. MSA and MWBD will oversee administration of this Plan and report to the	A. Work to keep the public informed of the participation of Local MBEs on the Projects by hosting outreach efforts and leveraging other communication platforms.	MSA City Schools MWBD	
Executive Committee on its status.	B. Provide a timeline of opportunities for MBEs to learn about upcoming bid packages and important deadlines.	MSA City Schools	
6. Commit to an effort to utilize Local MBEs beyond the construction phase of the Projects, specifically in professional services.	A. Create a plan that will identify potential contracting opportunities in the ongoing operation of the schools.	City Schools	

Definitions of Terms in the Plan

Advocacy Partners means business and/or trade associations that are organized to support and promote the utilization of minority and women -owned businesses in public and private procurement and business development opportunities.

City Schools means the Baltimore City Public Schools System, administered by the Chief Executive Officer under the direction and supervision of the School Board.

CRMSDC-certified means a minority-owned, operated, and controlled business that has obtained certification from the Capital Region Minority Supplier Development Council, which is a regional affiliate of the National Minority Supplier Development Council (NMSDC).

Executive Committee means the Executive Committee defined in the MOU.

GOMA means the Governor's Office of Minority Affairs.

Local MBE means an MBE with an address in the MDOT Directory, in the following order of priority: (1) within Baltimore City; (2) within a county that is contiguous to Baltimore City; and (3) within the State.

MSA means the Maryland Stadium Authority or its Program Manager for the Projects (Partners for Revitalization of Baltimore City Schools). **Minority Business Enterprise, State-certified MBE, or MBE** means a firm that satisfies the definition in Md. Code Ann., State Fin. & Proc.

§14-301(f) and is certified under the State MBE program by the Maryland Department of Transportation (MDOT) under COMAR 21.11.03. A current directory of certified MBEs is available through the MDOT Office of Minority Business Enterprise, 7201 Corporate Center Drive, Hanover, Maryland 21076, (410) 865-1269, 1-800-544-6056, or TTY (410) 865-1342. The directory is also available on the MDOT website at http://mbe.state.md.us/directory/.

SBR or Small Business Reserve Program means the program established in Md. Code Ann., State Fin. & Proc. §§14-501 – 14- 505.

STAT Committee means the STAT Committee defined in the MOU.

Supplier Diversity Sub-group means a workgroup, comprising MSA's MBE liaison, a representative of MWBD, a representative of Baltimore City Schools, a representative of GOMA, and representatives of MBE stakeholder organizations who will oversee the administration of the Plan and report to the Executive Committee on this subject. Members of the Supplier Diversity Sub-group who are representatives of MBE stakeholder organizations shall be deemed a "procurement official" under §13-211 of the State Finance and

Procurement Article, Maryland Annotated Code, and an "official" under Title 5, Subtitle 5 of the General Provisions Article, Maryland Annotated Code, for purposes of any response to a request for qualifications, request for proposals, invitation of bids, or other solicitation connected with the Projects and for any awarded contract in connection with the Projects.

WBENC-certified means a woman-owned business that has obtained certification from the Women's Business Enterprise National Council (WBENC), a national 501(c)(3) non-profit organization.

> As at January 1, 2021, there are (8) schools in swing locations.

21st Century School Buildings Engagement Process

The essential role of school stakeholders in the 21st Century School Buildings process.

Each school is unique. Creating modern, high-quality learning environments that meet the needs of individual school communities and support their vision for student success is a collaborative effort. The process for the design of each school building takes 18-24 months. The process for the construction of a school takes an additional 18-24 months marked by multiple opportunities for school communities to provide input and feedback.
