Qualified Business Report

FY 2025

Maryland Technology Development Corporation

October 2025

FY2025 Annual Qualified Business Report

(7/1/2024 to 6/30/2025)

Company Name	Company Description	County	City	State	Maryland Employees	Total Employees	Industry	Primary Reporting Program	Investment Date	Amount
EBO, Corp.	Maryland-based business works to create more efficient and inclusive processes for finding talent in the media industry.	Baltimore City	Baltimore	MD	1	1	Software	Social Impact	12/9/2024	$200,000.00
Revelo LLC	Revelo, LLC offers SaaS products and related services. Our core product is Revelo Software which is a flexible end-to-end, low code data collection, analysis and reporting SaaS platform that is secure, accessible and private. It can easily be configured with APIs including enterprise COTS, microservices and AI integration to allow users to quickly build applications. Revelo products include AcquisitionAI, CommentsAI, and iAccessible. Our Revelo platform includes survey capabilities, workflows, email integration, role-based permissions, IoT, decision and review aids, embedded analytics and customized reporting. Revelo is ideal for today's new AI use cases!	Prince George's County	College Park	MD	1	3		Seed Investment Funds	8/13/2024	$200,000.00
Ion Storage Systems, Inc.	Ion Storage Systems, Inc. is an early-stage solid-state battery manufacturer in Maryland, commercializing a novel solid-state battery for the defense and aerospace, medical, consumer, electric vehicles, and grid storage markets. ION's patented technology offers a battery that is non-flammable, energy dense, fast-charging, that requires no external compression or heating. ION recently commissioned a 1MWh pilot production line at its facility in Beltsville, MD, a first of its kind fully automated solid-state cell assembly line. ION is backed by leading venture and corporate investors including Toyota Ventures, Saint-Gobain, Tenaska, Alsop Louie Partners, Clear Creek Investments, and VoLo Earth Ventures.	Prince George's County	Beltsville	MD	63	69		Urban Business Innovation Initiative	9/23/2024	$1,500,000.00
Smeeple, Inc.	Smeeple is an innovative online platform that connects consumers with Subject Matter Experts (SMEs) through video conferencing. It simplifies the search for specialized knowledge by offering a diverse array of expert categories, including Culinary, Trades and Services, Sports, Gardening, and more. With a robust marketing strategy focusing on influencers and advisors, Smeeple aims to attract a broad network of experts and users. Its mission is to provide tailored solutions and expertise in a world increasingly demanding personalized attention.	Saint Mary's County	California	MD	1	1		Rural Business Innovation Initiative	10/21/2024	$25,000.00
ReBokeh	ReBokeh is developing modern, customizable assistive technology for people with moderate vision impairment.	Baltimore County	Towson	MD	1	1	Software	Social Impact	10/4/2024	$100,000.00
JuneBrain Inc.	JuneBrain provides accessible monitoring for neurology. We have created the Neuro-i: an AI-driven, wearable eye-scanning device and SaaS platform to detect new disease activity and enable clinicians to track disease progression and patient responses to treatment between clinical visits. Based in Baltimore, MD, our team includes seven full-time employees and collaborates with prestigious institutions like Johns Hopkins University and the University of Maryland Baltimore. The Neuro-i device and AI are patented and undergoing clinical testing for 510(k) clearance by the FDA. JuneBrain currently has $4.3M in sales backlog, including renowned eye care and neurology clinics in the US and Canada.	Baltimore City	Baltimore	MD	4	5	Life Sciences	Social Impact	7/11/2024	$200,000.00
CARRTECH CORP	CarrTech was established to address the complex and hazardous issue of glass shard contamination in medicine. The company has developed and patented an innovative solution: the first and only integrated all-in-one package featuring a one-needle, one-step filter. This breakthrough offers a safer, more efficient, and cost-effective method for preparing ampoule-based medications. CarrTech expects to receive FDA approval in 2024 and aims to enter the multi-billion-dollar industry with strategic partnerships. https://www.youtube.com/watch?v=mdbgWZ0J_VQ&ab_channel=SueCarr	Frederick County	Frederick	MD	1	1	Medical Device	Seed Investment Funds	8/23/2024	$250,000.00
PerVista, Inc.	PerVista leverages artificial intelligence to analyze electro optical signals from drones and surveillance cameras to detect weapons and proactively notify law enforcement authorities, with the goal of preventing weapons related crimes in public places.	Prince George's County	Greenbelt	MD	9	11	Software	Social Impact	8/5/2024	$100,000.00
Nostopharma LLC	Nostopharma is a preclinical stage pharmaceutical innovator developing treatments to address unmet needs of heterotopic ossification (pathology bone).	Montgomery County	Potomac	MD	3	3	Biotechnology	Social Impact	9/11/2024	$250,000.00
Pathotrak, Inc.	Pathotrak's technology reduces the detection time of food-safety tests from 1-2 days to 5h, helping food manufacturers cut costs on warehousing and refrigeration, enabling earlier product release and faster recalls, and avoiding outbreaks. Current 'rapid detection tests' for foodborne pathogens are too slow, 24-72h. In many cases, manufacturers hold the product at a steep cost. The bottleneck to detection is 'enrichment', a 22-48h step necessary to grow pathogens to detectable levels. Pathotrak's patented technology separates pathogens directly from the food sample after just 4 hours and is the first to enable the release of product within a single 8-hour shift.	Prince George's County	Laurel	MD	4	8	Physical Sciences	Maryland Venture Fund	9/12/2024	$250,000.00
Novel Microdevices, Inc.	Novel Microdevices, Inc., based in Baltimore, Maryland, is pioneering rapid point-of-care diagnostics with its innovative RT-PCR platform. The company's flagship product, the Novel Dx device, is a portable system weighing under four pounds, designed to deliver lab-quality results in approximately 15 minutes. This system utilizes polymerase chain reaction (PCR) technology on disposable cartridges, enabling the detection of pathogens such as RSV, Influenza A, Influenza B, and COVID-19. In November 2024, Novel Microdevices secured an additional $2.68 million in follow-on funding from the NIH RADx® Tech program, following the successful completion of key performance milestones.	Baltimore City	Baltimore	MD	14	15	Physical Sciences	Urban Business Innovation Initiative	9/26/2024	$249,999.91
Sybal Corp	Sybal Corp, headquartered in North Bethesda, is a pioneering force in governance innovation for regulated industries. Our cloud-based solution, Proof of Governance, has earned us international acclaim, recently culminating in a USA patent notice of allowance. With data-driven organizations being up to 23 times more likely to acquire customers, we offer the opportunity to invest in a transformative technology that empowers organizations to make informed decisions, retain customers, and drive profitability. Sybal's successful contract with a premier Maryland County Government client showcases our commitment to local impact and innovation, making us an ideal partner for visionary investors like Tedco Maryland.	Montgomery County	North Bethesda	MD	2	2	Software	Social Impact	9/12/2024	$25,000.00
SharpRank, LLC	SharpRank is the first and only Independent Evaluator in the sport betting industry, ensuring fair and transparent sports betting markets. By providing live monitoring dashboards, periodic reporting of audits and performance, and data solutions, SharpRank monetizes through subscriptions and multi-year contracts to key industry stakeholder groups like sportsbooks, state governments, and media properties. SharpRank has designed proprietary auditing standards and criteria for Independent Evaluator, which are in various stages of implementation throughout North America jurisdictions. The first mover and standard setter advantages, in a fragmented market, uniquely positions SharpRank to execute and iterate to stay ahead of impending competition.	Baltimore County	Timonium	MD	4	4	Software	Maryland Venture Fund	7/1/2024	$250,000.00
Hunter Labs Technologies Inc, DBA Plainr	Plainr provides teams and companies in private markets the capabilities to extract intelligence faster using tooling and proprietary AI/ML models. We are presenting a viable solution responding to a $427bn annual revenue market opportunity and solving a pressing need for teams working in more than 1.3m financial services companies and 4.3m private companies globally. Plainr is built by an excellent founding team of former operators and technologists with more than 25yrs of industry specific engineering experience. As a Techstars Equitech portfolio based in Baltimore, we have also created a great pipeline that leads us to our first $1m ARR	Baltimore City	Baltimore	MD	1	2	Software	Social Impact	9/30/2024	$25,000.00
Neurointact	NeuroIntact Inc. is a medical device company focused on revolutionizing patient care and outcomes by preserving neurological function through Brain Cooling. Our proprietary device cools the nasal cavity and brain, providing Therapeutic Hypothermia (TH) and Target Temperature Management (TTM) to protect brain tissue from damage caused by neuronal injury, cerebral edema, and oxygen deprivation.	Baltimore City	Baltimore	MD	3	3	Life Sciences	Seed Investment Funds	9/18/2024	$250,000.00
Marinalife, Inc.	Marinalife delivers tools and resources to allow the boating community to fully embrace life on the water. Marinalife joined with Snag-A-Slip in 2017 and together, we create tech-enabled solutions, allowing boaters and marinas to easily connect and transact. Headquartered in Baltimore, MD, our crew is passionate about two things: boating and delivering exceptional service to our customers.	Baltimore City	Baltimore	MD	11	12	Software	Maryland Venture Fund	9/6/2024	$200,000.00
QuoLab Technologies, Inc.	QuoLab is a complex/bulk data management platform driving the fusion, analysis and visualization of cybersecurity data in a unified environment. Organizations and users track and manage cases, investigate threats, and deliver findings via intuitive visualizations, reports and automated data sharing mechanisms. Quolab is a force multiplier of specialized security technologies (such as a SIEM or EDR) and automates the flow of critical threat data by directly integrating with analysts tools (like Binary Ninja and VMRay), data repositories (like Splunk and ElasticSearch) all while providing human users with the proper context and visualizations needed to understand, respond and report on threats.	Howard County	Columbia	MD	5	6	Software	Maryland Venture Fund	7/3/2024	$250,000.00
QuoLab Technologies, Inc.	QuoLab is a complex/bulk data management platform driving the fusion, analysis and visualization of cybersecurity data in a unified environment. Quolab is a force multiplier of specialized security technologies (such as a SIEM or EDR) and automates the flow of critical threat data by directly integrating with analysts tools (like Binary Ninja and VMRay), data repositories (like Splunk and ElasticSearch) all while providing human users with the proper context and visualizations needed to understand, respond and report on threats.	Howard County	Columbia	MD	5	6	Software	Maryland Venture Fund	7/3/2024	$250,000.00
PerSoN Clinic llc	PerSoN is a groundbreaking healthcare solution designed by scientists and supported by patented technology. It facilitates a compassionate continuum of care for patients burdened with multi-chronic conditions, sitting at the intersection of precision medicine and drug discovery. Our unique business model offers two tiers of connected products, catering to small practices, large clinics, and research organizations. By providing a comprehensive, holistic view of patient conditions, PerSoN empowers healthcare providers and researchers with actionable insights. With a patient-centric approach, we are revolutionizing healthcare delivery. Join us in shaping the future of precision medicine with PerSoN.	Montgomery County	N Behtesda	MD	5	10	Software	Social Impact	8/7/2024	$100,000.00
MSTRO	The Next GitHub for Collective Intelligence Imagine all your organization's intelligence in one place, where every employee, regardless of technical skill, can contribute to and benefit from collective knowledge. That's MSTRO—a revolutionary platform that unifies data access, insight generation, and knowledge management into one seamless, user-centric hub. Unlike fragmented traditional tools, MSTRO learns from human interactions with data, transforming individual expertise into powerful collective intelligence. MSTRO accelerates decision-making, drives innovation, and maintains a competitive edge—all in a system that's easy to deploy and scale globally. Your entire organization's intelligence, unified and accessible in one secure, version-controlled, client-owned platform.	Frederick County	Frederick	MD	5	10		Seed Investment Funds	12/19/2024	$500,000.00
Hememics Biotechnologies, Inc.	Hememics Biotechnologies, Inc., a privately held biosensor company located in Gaithersburg, Maryland is finalizing the development of a fundamentally different testing platform that can achieve near PCR-level accuracy at lateral-flow costs and is capable of testing multiple antibodies, antigens and molecular targets simultaneously. This low-cost platform consists of a rugged, battery-operated, handheld reader and a low-cost disposable biosensor that can conduct up to 32 tests simultaneously using patented desiccation technology and achieve results within 2- 5 minutes. The system can be wirelessly integrated with a cloud-based data analytics back end to track emerging threats dynamically.	Montgomery County	Gaithersburg	MD	10	10	Physical Sciences	Maryland Venture Fund	1/3/2025	$250,000.12
Pixee Inc.	Meet your automated product security engineer Pixeebot fixes vulnerabilities, hardens code, squashes bugs, and gives engineers more time to focus on the work that counts. We are an AI-enabled GitHub app that looks through your code and makes actual suggestions for improvement. Our team is primarily in the USA; mainly in Maryland. Most of us have worked together at a Maryland application security company (Contrast Security) and are happy to be working together again. Pixee users range from individual developers around the world to developers at major multinational companies.	Baltimore County	Baltimore	MD	7	13		Seed Investment Funds	2/21/2025	$999,999.69
Tao Treasures LLC DBA Nanobiofab	An AI 'smoke detector' for infection—nanosensors identify pathogens by scent within minutes.	Frederick County	Frederick	MD	6	6	Medical Device	Social Impact	11/25/2024	$200,000.00
CoapTech, Inc.	CoapTech's PUMA System is a novel platform of high-margin disposable catheters which enable several new minimally invasive surgical procedures using standard point-of-care ultrasound. CoapTech's PUMA-G product is demonstrating outstanding published results (including substantially reduced per-patient Hospital Costs) in a targeted commercial launch phase, and aims to become the new gold-standard method for gastrostomy (feeding tube placement). The PUMA-G system is FDA cleared to enable bedside enteral feeding tube placement, using solely point-of-care ultrasound and requiring no additional specialists / consultants / surgical suites. CoapTech has raised $13M of venture funding and received ~$4M in grants (including 4 from the NIH).	Baltimore City	Baltimore	MD	9	18	Life Sciences	Seed Investment Funds	3/14/2025	$499,999.87
Sybal Corp	Sybal Corp, headquartered in North Bethesda, is a pioneering force in governance innovation for regulated industries. Our cloud-based solution, Proof of Governance, has earned us international acclaim, recently culminating in a USA patent notice of allowance. With data-driven organizations being up to 23 times more likely to acquire customers, we offer the opportunity to invest in a transformative technology that empowers organizations to make informed decisions, retain customers, and drive profitability. Sybal's successful contract with a premier Maryland County Government client showcases our commitment to local impact and innovation, making us an ideal partner for visionary investors like Tedco Maryland.	Montgomery County	North Bethesda	MD	2	2	Software	Social Impact	12/2/2024	$200,000.00
NextStep Robotics Inc.	NextStep Robotics has developed and tested a novel exoskeleton controller to help teach stroke patients to walk without their assistive devices. Commercialization of the first product , AMBLE, to treat foot drop after stroke is underway and after receiving $5.4M in grant funding from NIH the technology has now entered into clinical trials for FDA approval and is eyeing opportunities to expand the product portfolio to fit the IP claims of "use of the controller over any impaired joint".	Baltimore City	Baltimore	MD	9	10		Maryland Innovation Initiative	10/21/2024	$200,000.00
Hunter Labs Technologies Inc, DBA Plainr	Plainr provides teams and companies in private markets the capabilities to extract intelligence faster using tooling and proprietary AI/ML models. We are presenting a viable solution responding to a $427bn annual revenue market opportunity and solving a pressing need for teams working in more than 1.3m financial services companies and 4.3m private companies globally. Plainr is built by an excellent founding team of former operators and technologists with more than 25yrs of industry specific engineering experience. As a Techstars Equitech portfolio based in Baltimore, we have also created a great pipeline that leads us to our first $1m ARR	Baltimore City	Baltimore	MD	1	2	Software	Social Impact	9/30/2024	$25,000.00
PerVista, Inc.	PerVista leverages artificial intelligence to analyze electro optical signals from drones and surveillance cameras to detect weapons and proactively notify law enforcement authorities, with the goal of preventing weapons related crimes in public places.	Prince George's County	Greenbelt	MD	9	11	Software	Social Impact	5/7/2025	$250,000.00

Clause Logic Inc dba Standd	Standd runs deals and enhances decision-making at buy-side companies so they can scale up speed and capacity, and achieve higher returns. Our no-prompt agent, embedded in a suite of multi-player tools, automates low value work, creates and continually updates complex, customizable reports, and provides financial and risk analysis with unprecedented accuracy. The founding team combines Julie's (CEO) experience as a top litigator at the Justice Department and Stephen's (CTO) years building and scaling big data and AI/ML products, like he did as VP of Engineering at AngelList. Standd is a graduate of the AWS Impact Accelerator and Techstars Seattle.	Prince George's County	College Park	MD	2	3		Social Impact	4/21/2025	$300,000.00
Astek Diagnostics Inc.	Astek Diagnostics is a medical technology company developing the Jiddu™ Platform, a rapid diagnostic system that delivers antibiotic susceptibility results in under one hour. The platform helps clinicians make faster, targeted treatment decisions for infections such as urinary tract infections, sepsis, and wound infections. Traditional culture-based methods take 48–72 hours; Astek's phenotypic approach delivers results at the point of care without sacrificing accuracy. Backed by independent clinical studies and partnerships with leading hospitals, Astek is advancing toward FDA clearance and broader clinical adoption. Its mission is to reduce diagnostic delays, combat antibiotic resistance, and improve outcomes through faster, data-driven decisions.	Baltimore County	Halethorpe	MD	4	7	Biotechnology	Seed Investment Funds	4/4/2025	$250,000.00
Keep Company Inc	Keep Company partners with employers to stop preventable attrition of parents & caregivers. Our proprietary technology gathers groups of up to 8 people based on their work and caregiving responsibilities. An expert coach then leads each group through our year-long, behavior science-based curriculum as they collectively learn how to integrate their needs as humans into the demands of work and life. Utilizing data science, we provide actionable insights back to employers that enable them to meaningfully support this talent -- helping employers manage burnout and attrition risk before the exit interview, and long-term, narrowing gender and diversity leadership gaps.	Montgomery County	Bethesda	MD	8	8	Software	Social Impact	5/5/2025	$500,000.00
Hunter Labs Technologies Inc, DBA Plainr	Plainr provides teams and companies in private markets the capabilities to extract intelligence faster using tooling and proprietary AI/ML models. Plainr is built by an excellent founding team of former operators and technologists with more than 25yrs of industry specific engineering experience. As a Techstars Equitech portfolio based in Baltimore, we have also created a great pipeline that leads us to our first $1m ARR	Baltimore City	Baltimore	MD	1	2	Software	Social Impact	5/21/2025	$100,000.00
Kubanda Cryotherapy, Inc	I recently started Global Assistive Technologies, located in Columbia, Maryland, which is a new E-Commerce business, which will mainly focus on Medical and non-medical assistive devices and may offer some illustrative instructions on the usage of the products. The assistive devices are mainly external devices that are designed, made or adapted to assist people to perform or live a healthy life. Our main goal will be to help people have access to affordable, appropriate assistive devices that are of good quality and enable them to participate in life, at home, school, and at work and in the community.	Baltimore City	Baltimore	Maryland	5	5	Healthcare	Social Impact	5/12/2025	$500,000.00
AGED Diagnostics	AGED Diagnostics is disrupting the progression of fatty liver disease: While liver disease affects 1 in 3 Americans, and health insurers spend $108 billion annually on management, there are no effective noninvasive tools. AGED is developing the first accurate, noninvasive blood test using a targeted sequencing assessment. Our team has completed several pilot studies to validate our core technology and found a set of biomarkers that can differentiate between the benign and advanced form with 90-99% accuracy from patient blood.	Montgomery County	Rockville	MD	4	4	Life Sciences	Seed Investment Funds	5/28/2025	$250,000.00
Higher Medicine	Higher Medicine (HMD) develops a small-molecule LSD1 inhibitor to restore transcriptional balance in the brain and other tissues to treat Kabuki Syndrome (KS) and lay the foundation for broader applications in epigenetically driven brain conditions such as TBI, autism spectrum disorders, and age-related cognitive decline, where epigenetic transcriptional dysregulation plays a critical role.	Cecil County	Elkton	MD	1	1		Social Impact	5/7/2025	$100,000.00

CurieDx	CurieDx will transform telehealth with a clinical decision support system predicts illness and injury from a smartphone image. The evidence-based AI models are designed for telehealth users, analogous to point-of-care tests such as strep throat swabs and urine dipsticks for urinary tract infections. This product can finally enable many urgent care patients to be treated virtually, for conditions that traditionally required an in-person test.	Baltimore County	Baltimore	MD	5	10		Social Impact	5/15/2025	$100,000.00
Innate 3D, Inc. (DBA) Innate Technologies, Inc.	Innate 3D is a subscription-based platform offering cutting-edge software solutions that empower manufacturing businesses to make data-driven decisions. With advanced process algorithms and data analytics, our platform transforms operations and provides easy access to critical insights. By leveraging a unique automatic parts-nesting engine and practical AI applications, Innate 3D revolutionizes the industry while employing a flexible subscription model for users.	Montgomery County	North Bethesda	MD	3	4	Software	MEIF	3/12/2025	$250,000.00
Pirl Technology, Inc.	Pirl is accelerating the transition to electrified transport by building long-lasting, low maintenance, environmentally friendly, field-upgradeable electric vehicle chargers. Pirl solves the industry-wide problem of low EV charger uptime rate (estimated at 54%) by developing next-generation, ultra-reliable EV chargers that increase uptime to the targeted 97%.	Montgomery County	Rockville	MD	1	1	Mobilitytech	Social Impact	6/16/2025	$100,000.00
The Magruder Project DBA App Beacon	We provide branded mobile apps to service businesses	Howard County	Columbia	MD	2	3	Retailtech	Social Impact	6/11/2025	$250,000.00
JuneBrain Inc.	JuneBrain provides accessible monitoring for neurology. We have created the Neuro-i: an AI-driven, wearable eye-scanning device and SaaS platform to detect new disease activity and enable clinicians to track disease progression and patient responses to treatment between clinical visits. Based in Baltimore, MD, our team includes seven full-time employees and collaborates with prestigious institutions like Johns Hopkins University and the University of Maryland Baltimore. The Neuro-i device and AI are patented and undergoing clinical testing for 510(k) clearance by the FDA. JuneBrain currently has $4.3M in sales backlog, including renowned eye care and neurology clinics in the US and Canada.	Baltimore City	Baltimore	MD	4	5	Life Sciences	Social Impact	6/16/2025	$250,000.00
LePrix Inc	LePrix is the leading technology marketplace platform for the $51B pre-owned luxury supply chain for retail business. LePrix is a two-sided marketplace platform: (1) LePrix Wholesale (B2B), which is our main focus, allows businesses to source pre-owned luxury wholesale from the best suppliers in the world including auction houses. In fact, LePrix was the first to bring auctions from Japan to the US retail businesses. As such, LePrix has first mover advantage in bringing the pre-owned wholesale supply chain online. (2) LePrix.com (B2C) allows resale retailers to us our platform to bring their store online and sell to online shoppers.	Montgomery County	Bethesda	MD	24	33	Software	Maryland Venture Fund	5/9/2025	$150,000.00
Longeviti Neuro Solutions LLC	Longeviti has advanced neurosurgery through the development of neurosurgical implants that address the functional and reconstructive needs of patients undergoing neurosurgery (around 300k in the U.S.). Longevit's products convert space in the skull into real estate for varying implantable neuro-technologies. We have brought multiple FDAcleared implants to market. Among Longeviti's core competencies, are implant accommodation with the only sonolucent implants on the market today. In the past, neurosurgical implants focused on only one of two primary neurological needs either the functional requirements of the implant, or the reconstructive requirements. Longevitis products address added benefits,to payers and providers.	Baltimore City	Baltimore	MD	28	52	Physical Sciences	Maryland Venture Fund	4/30/2025	$499,997.62
upling	We partner with high-quality dispensaries to provide a diverse marketplace and the tools needed to enable safe and reliable cannabis transactions for pickup or delivery. We are a group of individuals on a mission to diversify the safety of transactions and data collection in a cannabis global market. Upling is a progressive company with a constant commitment and dedication to delivering value to individuals and dispensaries all over the nation.	Anne Arundel County	Laurel	MD	1	1		Social Impact	7/2/2025	$150,000.00
NasaClip, Inc.	NasaClip is a medical device start up introducing the first and only adjustable nosebleed rescue that was designed by CEO/Co-Founder Dr. Liz Clayborne. It combines intranasal sponges that can be medicated with external compression that is sized for adults and children and empowers anyone anywhere to stop nosebleeds fast.	Baltimore County	Baltimore	MD	2	4	Life Sciences	Social Impact	7/23/2025	$250,000.00
